

Miele washer-disinfectors for CSSDs and hospitals

50
YEARS Medical Technology

Quality from Miele Professional – Never be satisfied with less!

In developing reprocessing solutions for hospitals and CSSDs, Miele Professional has attached great significance over the past 50 years to working closely both with specialists in the medical field and instrument manufacturers. A cooperation based on trust and spawning innovations which prove their value in workaday life.

50 YEARS Medical Technology

Quality

Your patients rely on your professional skills, so why not in turn place your trust in Miele's proverbial quality! The combination of choice materials, perfect workmanship and mature and sophisticated technology has earned Miele its exceptional reputation in the field of medical technology. And Miele's after-sales service is renowned for its award-winning excellence.

Capacity

Machines from Miele Professional excel in terms of their superior performance. A wide selection of accessories and processes reflecting everyday, practical needs leads to perfect results and high throughput, even in highly specialised applications. This ensures that expensive instruments are ready for use again in next to no time.

Efficiency

Profit on a daily basis from the unique economic proposition machines from Miele Professional represent: They are thorough and fast and are also gentle on materials. Thanks to their high quality, they are also low-maintenance and durable, adding to the value of your investments. The sparing use of water and chemicals further contributes towards keeping operating costs in check.

Developed for daily use: System4Med, a new approach to professional instrument reprocessing, meets the highest of demands by addressing all aspects of the instrument reprocessing cycle. This systematic approach ensures perfect results whilst reducing the strain on materials and ensuring economic reprocessing in modern-day CSSDs.

- Washing and disinfection
Innovative washer-disinfectors with customisable features.
- Sterilisation
Powerful large steam sterilisers for the fast reprocessing of instruments and textiles.
- Documentation
Intelligent documentation software for reproducible and uninterrupted process monitoring
- Guarantees:
Miele guarantees the highest of standards in providing advice, financing, after-sales service and validation of the highest Miele quality.

Customised systems in three size categories:

Miele stands for innovation with respect to systematic washing, disinfection and the systematic sterilisation of medical devices: All system components, processes, after-sales service – for the flexible, reliable and efficient use of validatable machine-based processes.

Please do not hesitate to contact us if you require further information:

Cleaning programmes

Miele innovations for particularly critical cases. Milestones in the optimisation of cleaning results:

1994

VARIOTD

The **Vario TD** method can now be seen as the standard programme for routine instrument cleaning and disinfection, achieving good removal of protein-based contamination (blood, secretion) from instruments which do not pose a particular challenge. Thermal disinfection takes place at > 90°C for 5 minutes. To protect instruments, the final rinse is performed ideally with demineralised water without surfactant. The Vario TD-AN programme with its modified parameters is available to reprocess thermo-stable anaesthetic instruments.

- Intensive cleaning below protein denaturation temperature
- Disinfection according to EN ISO 15883
- Exceptional material compatibility

2004

OXIVARIO

OxiVario
Special programme for the critical instruments used in trauma surgery as well as high-frequency cauterising instruments requiring higher standards of cleaning.

- Excellent cleaning and removal of organic soil
- Time-saving as there is no need for pre- and post-treatment

OXIVARIO PLUS

OxiVario Plus
Special programme to prevent the iatrogenic spread of vCJD according to guidelines published by the task force set up by Germany's Robert Koch Institute.

- Excellent cleaning and removal of organic soil
- Time-saving as there is no need for pre- and post-treatment

2005

ORTHOVARIO

OrthoVario
Special programme for orthopaedic instruments including motor systems and other medical products made from aluminium.

- Excellent cleaning performance
- Good material compatibility even on instruments sensitive to alkalinity

2011

ROBOTVARIO

RobotVario
Special-purpose programmes, matching process chemicals and load carriers for the reprocessing of instruments frequently used in robotic-assisted surgery.

- Accommodates up to 8 shafted instruments and offers space for two further special instruments
- Modular design of load carrier enables reprocessing of various instrument generations and types
- Thorough irrigation of all lumens thanks to innovative injector system
- Integrated microfilter for additional filtration of wash liquor

Since 2014: RobotVario X-tra
From the end of 2014 onwards, the newly developed ROBOTVARIO X-tra system will further shorten cycle times and also offers increased capacity and allows the reprocessing of various generations of robotic-assisted instruments.

Highly skilled Miele after-sales service

Miele offers service packages which are closely geared to the requirements of CSSDs.

A team of skilled and knowledgeable medical product advisers is available to support clients with their expertise both during the planning phase and later during operation.

In addition to a wide range of services, Miele service engineers also provide assistance in optimising and redesigning cleaning processes and reprocessing methods. With its product lineup, Miele always tries to contribute towards simplifying procedures in hospitals and making them safer and more efficient.

Services, Service contracts

In order to guarantee maximum forward cost visibility, Miele recommends that its clients take out service contracts:

- Inspection
- Maintenance
- Full service maintenance

Validated performance

Miele also offers a series of process checks performed by highly qualified Miele medical product engineers in accordance with the relevant legislation and standards as well as national guidelines and good-practice recommendations:

- Initial validation consists of installation, operation and performance qualification after machine installation
- Revalidation (repeat performance qualification) is generally necessary every 12 months, after maintenance, repairs or after any modifications to installation or operation parameters.

Exclusive to Miele

- Blanket service coverage combined with fast response
- 90% of service calls result in first-time fixes
- Key genuine spares available for 15 years after discontinuation of series production

It is not without reason that Miele's after-sales service operation has been acclaimed for many years in succession for its excellence (in an annual survey performed by ServiceBarometer AG, Munich).

Washer-disinfectors

PG 8527 and PG 8528

Adding value to instrument reprocessing in CSSD

Miele Professional has been setting milestones for decades in the field of efficient and safe machine-based reprocessing in clinics and surgeries. And, once again, Miele is setting new standards with the PG 85 machine generation. When it comes to centrally or decentrally reprocessing large quantities of instruments, Miele's PG 8527 and PG 8528 offer huge benefits: Greater cleaning capacity, improved process security and better efficiency.

PerfectEco – combined water and energy savings

PG85 PerfectEco

- **Economic operation through lower water and electricity consumption**
- **Excellent washing and disinfection**

Thanks to an innovative combination of water and heat recovery, large-chamber decontamination units from the PG 85 series can be put to use in CSSDs even more efficiently. Waste heat from the drying cycle is channeled through the steam condenser to pre-heat the incoming demineralised water supply. The pre-heated demineralised water is then heated to a higher temperature in the boiler in readiness for the final rinse. This way, process heat is kept within the system and put to direct use. A heat-recovery steam condenser also dispenses with the need for an intake of cold water which, on the unconverted model, is discharged after use into the drainage system. So in addition to energy savings, this approach results in a significant reduction in water consumption of up to 130 l per cycle. PerfectEco is also available as a retrofit kit.

- 1 Demineralised water intake, cold
- 2 Heat-recovery steam condenser
- 3 Demineralised water boiler with additional heating
- 4 Demineralised water intake into chamber
- 5 Hot waste air
- 6 Cooled waste air

PerfectTouchControl – Simple, local-language controls

PerfectPure sensor – Residue-free rinsing

PG85 | PerfectTouchControl

- **Optimum user convenience**
- **Reliable hygiene**
- **Perfect control**

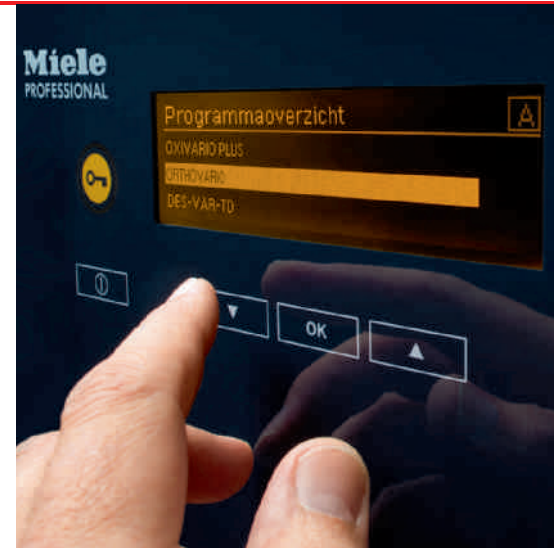

Simple to operate, easy to clean: Washer-disinfectors from the PG 85 series feature a touch-sensitive display. This easy-to-use PerfectTouch display guarantees unique user convenience combined with superb hygiene. A fully flush, chemical-proof display screen makes for simple and effective wipe disinfection.

The controls are outlined on the glass surface and slight pressure is enough to activate functions and launch programmes, even when wearing protective gloves.

The man-machine interface involves the use of only a very limited number of controls; all steps in the process appear in the display in the user's own language. Display texts, for example for A0 values, actual temperatures, conductivity, countdown times and all other protocol data can be defined individually. Using the data, integrated A0 value controls, parameters can be set to comply with national standards or to suit a hospital's own regime.

Exclusive to Miele

- Chemical-resistant glass surfaces
- Innovative programme cycles

PG85 | PerfectPureSensor

- **Continuous conductivity monitoring**
- **Residue-free rinse quality**
- **Safe reprocessing**

Residue in the final rinse can have a negative impact on reprocessing results. Alkaline residue in ophthalmology, for instance, can in extreme cases result in serious complications when instruments are reused. Excessive residue can also result in corrosion and deposits on instruments.

The new and patented PerfectPure conductivity meter reliably detects the presence of minerals in the rinse water, such as the dissolved salts introduced with alkaline or acidic process chemicals, limiting them to a threshold level defined by the user.

Conductivity monitoring is contact-free using a maintenance-free system with extremely precise tolerance in the 5–40 $\mu\text{S}/\text{cm}$ and 40 $\mu\text{S}/\text{cm}$ - 100 mS/cm ranges. Depending on machine settings, conductivity readings can even be used to

control the programme cycle. This allows the number of necessary rinse cycles to be determined automatically if conductivity is outside the predetermined range: Recording conductivity over the entire process helps ensure the reproducibility of validated processes. Recording conductivity over the entire process helps ensure the reproducibility of validated processes.

Exclusive to Miele

- Maintenance-free conductivity monitoring

CombiEco System – The intelligent approach to water and energy savings in CSSD

With the help of a manifold, water from the final rinse on PG 8528 washer-disinfectors is fed into a buffer tank serving a container and trolley washer.

Saving resources with Miele

Miele washer-disinfectors from the PG 8528 series and container and trolley washers from the PG 88 series already achieve excellent standards of cleaning and disinfection combined with the efficient use of water and energy. Thanks to the new cross-product approach to water and energy recycling afforded by the CombiEco system, both can now be deployed even more efficiently in the CSSD context.

In a typical CSSD with several PG 8528 units and a container and trolley washer, valuable fully demineralised water can be collected after the rinse cycles on PG 8528 washer-disinfectors and fed via a manifold to a buffer tank to enable the heat energy in the water to be used in the container and trolley washer when used to reprocess for example containers and transport trolleys.

This saves on valuable and expensive resources and further considerably improves a CSSD's green credentials.

PerfectFlow sensor – Volumetric monitoring of dispensed quantities

PerfectSpeed sensor – Spray arm monitoring

PG85 PerfectFlowSensor

- **Continuous monitoring of dispensed volumes**
- **Precise results, user-defined tolerances**
- **Perfect dispensing control**

A decisive factor contributing to good reprocessing results is the precise volumetric control of dispensed chemicals. The currently valid DIN EN ISO 15883 standard prescribes the redundant monitoring of dispensing. Miele's new PerfectFlow sensor using ultrasound technology offers considerably greater safety margins than conventional systems. The PerfectFlow sensor is a standard feature and guarantees a hitherto unparalleled degree of precision in controlling and monitoring volumetric flow, independent of viscosity and ambient temperatures. The monitoring system is fully independent of the dispensing system and can be calibrated.

Dispensing tolerances can be set to comply with legal standards or defined individually; chemicals are dispensed efficiently and reliably, irrespective of the type of product or ambient conditions (continuous operation, fluctuating climatic conditions). Any deviation from the target quantities are safely detected and the reproducibility of validated processes guaranteed. An error message is issued or the programme is aborted if values are outside the tolerance range.

Exclusive to Miele

- Extremely precise
- Product- and temperature-independent dispensing control

PG85 PerfectSpeedSensor

- **Precisely monitored reprocessing**
- **Improved reproducibility of validated processes**
- **Perfect washing and disinfection results**

To guarantee perfect and safe cleaning and disinfection results, the rotational speed of the spray arms must be within defined limits. With the new PerfectSpeed sensor, the precise speed of each individual spray arm is carefully monitored and documented – whether in the cabinet or on board baskets and load carriers. The spray arm monitoring feature uses a sensor strip located outside the cabinet to detect the passage of spray arms and to ensure that speeds are within the specified range. Information shown in the display indicates whether the values are correct or whether the user must intervene on account, for example, of excessive foam slowing spray arm motion down.

In the event of a deviation from target values, either an error message is issued or the programme is interrupted immediately to allow the user to deal with the cause of the fault, depending on system parameters.

Deviations can also be recorded by automatic process documentation. Spray arm sensing offers effective protection against spray arm blockages by items in the load and also provides information on pressure conditions in the machine, on load carriers and in baskets. And, most importantly, spray arm speeds provide a valuable indication as to the reproducibility of validated processes, increasing safety margins in machine-based instrument reprocessing systems by a considerable degree.

Exclusive to Miele

- Spray arm monitoring on **all** levels
- Monitoring of spray arms speeds

PerfectFineFilter – Micro-filtration of wash liquor

PerfectDoc – Gap-free documentation

PG85 PerfectFineFilter

- **Micro-fine filtration with 0.2 mm mesh size**
- **Highly efficient filtration of wash liquor**

The thorough removal of residuals from the wash liquor equates to greater security in reprocessing, better instrument functionality and the preservation of the value of instruments.

With the micro-fine filter with a mesh size of only 0.2 mm combined with an expansive surface area, even the smallest of particles are reliably removed from circulation.

Particularly when treating the narrow-lumened instruments used in ophthalmology and micro-surgery, users stand to profit greatly from better cleaning performance and a reduced need for inspection.

Exclusive to Miele

- Micro-fine filtration with 0.2 mm mesh size

PG85 PerfectDoc

- **Continuous process documentation**
- **Wide range of parameters documented**
- **Perfect process traceability**

The PG 8527/28 is fitted with a network interface for process documentation as a standard feature. The PerfectDoc module allows the machine to interface with process documentation software. This facilitates the recording of many process parameters, including temperatures, as well as the documentation of entire process protocols including A0 values, dispensed quantities, spray arms speeds and conductivity readings. Alternatively, a printer can be used for documentation purposes.

Exclusive to Miele

- Simple integration into standard process documentation systems without additional hardware or software
- Comprehensive sterile supplies logistics with process documentation, instrument management and administration of sterile supplies

Machine features and specifications

Versions

- PG 8527: Single-door model with vertical sliding door
- PG 8528: Two-door barrier washer-disinfecter for installation in a diaphragm wall

Capacity per cycle

- 18 DIN mesh trays

150 x 300 x 600 mm
- 4 DIN containers
300 x 300 x 600 mm
- 7 AN sets
or 3 MI sets

Design

- Stand-alone or side-by-side installation
- Width 1150 mm
- Modular machine concept, customisable features
- Single-chamber system for washing, disinfection and drying
- Service-friendly design
- Heater elements outside wash chamber
- Low heat and sound emissions thanks to double insulation

Vertical-rise all-glass doors and cabinet lighting

To improve process visibility and supervision, all-glass vertical-rise doors are available as optional extras on the new range of products. The door can be programmed to open automatically at the end of a programme. Door motion is monitored electronically.

Models with all-glass doors also feature cabinet lighting comprising 4 integrated spotlights. Lighting times are programmable.

Cleaning technology

- Hygienic freshwater system with fresh water intake in each programme stage
- Cleaning, disinfection and drying in a closed, single-cabinet system
- Hygienic stainless-steel wash cabinet with coved corners and sloping self-draining ceiling
- 2 spray arms in cabinet for thorough cleaning of instrument surfaces
- Spray arms with high water impact force
- Full water jet access, ensuring optimum results

- Thorough cleaning of lumens thanks to injector system
- Direct docking of load carriers to water circuit

Standard features

- 2 powerful circulation pumps
- Triple filtration with large surface filter, coarse filter and micro-fine filter
- Filters in inlet hoses
- Flowmeter to monitor water intake quantities
- 1 dump valve
- Spray arm monitoring
- Ultrasound flow control
- Automatic load carrier detection

Dispenser systems

- 2 bellows-type dispenser pumps for liquid detergent and neutralising agent
- Extendible (further 3 internal dispenser pumps retrofittable)

Exclusive to Miele

- Maintenance-free dispensing technology

 - 16 standard washing and disinfection programmes
 - 17 service programmes
 - 31 vacant programme slots
- User interface with local-language display
- Display of programme selection and programming dialogs, countdown time, faults and operating hours.
- Compilation of new programmes using machine controls or using PC/laptop via optical interface

Interfaces

- 1 x RJ 45 network interface for process documentation
- 4 serial interfaces, for example for remote service
- Optical interface for service and maintenance

Printer

- Integrated 8-pin printer to record key process parameters

Automatic load carrier recognition

- Sensors for load carrier recognition and programme assignment

Multiport

- For connection of printer and/or scanner

Safety features

- Electric door lock
- Programme recontinuation in event of power outage
- Peak-load negotiation
- Optical and acoustic signal at end of programme
- 2 separate sensors for temperature monitoring and control
- Port for simple positioning of sensors in the wash cabinet for process validation
- Sensors in cabinet and a magnetic strip on load carriers for automatic assignment of programmes to load carriers
- Volume flow control
- Spray arm sensing

- Load capacity for levels 1-3:
3 DIN mesh trays (485 x 254 x 50 mm)
or
3 DIN mesh trays (540 x 254 x 50 mm)
or
2 ISO mesh trays (485 x 344 x 50 mm)
- Load capacity Level 4:
3 DIN mesh trays (485 x 254 x 50 mm)
or
2 DIN mesh trays (540 x 254 x 50 mm)
or
various bowls, injector nozzles for lumened instruments
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 590, W 640, D 790 mm

Supplied as standard with:

- 3 x E 362 blanking screws
- 2 x E 447 adapters, female, for male LuerLock
- 2 x E 449 adapters, male, for LuerLock, female
- 4 x injection nozzles 4 mm, length 110 mm (Mat. no. 4 175 030)
- 3 x injection nozzles 4 mm, length 120 mm with spring support (Mat. no. 4 398 951)
- 3 x E 980 angled adapters

Mat. no. 6 893 870
Art. no. 69.5901.03

E 980 angled adapter

- Enables connection of long lumened instruments
- Screw fittings for various LuerLock adapters or nozzles for lumened instruments

Art. no. 69.5986.01

E 936 insert for boom lamp handles

- For various lamp handles
- 15 receptacles
- L 500, W 245, H 90 mm

Mat. no. 7 759 480

Art. no. 69.5936.01

Illustration shows Miele test kit with Merck coding strips and reflectometer (not included)

TK/1 test kit

- Tests for the presence of proteins and monitors cleaning results
- Contents sufficient for 48 tests
- With coding strips for reflectometer

Post-reprocessing security

In collaboration with Merck, Miele has developed a protein test (test kit) to provide a fast method of checking cleaning performance on instruments. This allows regular quality control of cleaning performance.

Mat. no. 6 157 330

ProCare protein check

- Test to determine protein residue after thermal disinfection
- Proof of protein residue and qualitative evaluation
 - Precise application with indicator pen
 - Short 3-minute exposure time
 - 3 pens per box

Load carrier for containers

E 910/4 load carrier (empty)

- For 6 DIN containers and lids
- Container size: 150 x 300 x 600 mm
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 455, W 640, D 790 mm

Mat. no. 7 439 500
Art. no. 69.5910.05

E 911/3 load carrier (empty)

- For 4 DIN containers and lids
- Container size: 300 x 300 x 600 mm
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 455, W 640, D 790 mm

Mat. no. 6 943 850
Art. no. 69.5911.04

E 912/2 load carrier (empty)

- For 4 ISO containers and lids
- Container size: 180 x 400 x 600 mm
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 455, W 640, D 790 mm

Mat. no. 6 943 860
Art. no. 69.5912.03

E 913/3 load carrier with drying connection (empty)

- Load carrier for containers/lids/mesh trays
3 levels
- Load dimensions:
Level 1: for 3 DIN containers
150 x 300 x 600 mm with lid
- Level 2: H 97, W 575, D 780 mm
- Level 3: H 103, W 595, D 780 mm
- 2 built-in spray arms
- Connections for 5 lumened instruments
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 574, W 640, D 790 mm

Mat. no. 6 893 880
Art. no. 69.5913.04

E 934/1 load carrier (empty)

- For orthopaedic containers on 4 levels
- Clearances from bottom:
Level 1: H 90 or 180 mm
(w/o Level 2), W 585, D 780 mm
- Level 2: H 90, W 595, D 780 mm
- Level 3: H 167, W 595, D 780 mm
- Level 4: H 180, W 595, D 780 mm

- **Level 2 is removable.** This gives a clearance on Level 1 of 180 mm.
- Spray arms below Levels 3 and 4
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 500, W 640, D 790 mm

Mat. no. 7 765 770
Art. no. 69.5934.02

Load carriers and modules for orthopaedic instruments

E 941 load carrier with drying connector (empty)

- For modules on 2 levels
- Depending on the size of the glassware, up to 2 modules can be accommodated on each level
- Water and drying air enters via a direct docking system and adapters.
- Loading dimensions (from bottom upwards):
Level 1 = (without top module)

E 929/1 mobile injector unit with drying connector

- 3 levels for approx. 6 OP sets
- Vertical clearance:
 - Level 1: 94 mm
 - Level 2: 100 mm
 - Level 3: 287 mm
- Capacity: 6 DIN mesh trays
- 45 nozzles on the right-hand side (23 male and 22 female LuerLock adapters)
- 28 nozzles on left-hand side (horizontal), each with hose and male LuerLock adapter (E 792)
- Connection for 2 x E 478 on feed pipe
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 492, W 640, D 790 mm

Mat. no. 6 893 890
Art. no. 69.5929.02

Supplied as standard with:

- 14 connectors LuerLock female/female (E 790)
- 14 connectors LuerLock female/male (E 791)
- 2 x E 476 adapters
- 1 x E 477 stopper

- 1 x E 464 sleeves for E 454 injector nozzles
- 2 x E 456 spring stays for MI instruments

Supplied as standard with E 925:

- 1 x E 336 MIBO irrigation sleeve, Length 121 mm, 11 mm
- 2 x E 362 blanking screws, 11 mm
- 1 x E 442 irrigation sleeve, length 121 mm, 11 mm, with cap 6 mm
- 2 x E 447 female adapter
- 4 x E 448 hose with thread
- 2 x E 449 LuerLock adapter, male
- 4 x E 452 injector nozzles, 2.5 x 60 mm, screw thread
- 3 x E 453 injector nozzles, 4.0 x 110 mm with clamps, screw thread
- 3 x E 454 injector nozzles for trocar sleeves, 10-15 mm, screw thread
- 1 x E 464 adapter for injector nozzle E 454
- 1 x E 472 clamp for injector nozzle, Ø 4 mm
- 1 x E 907 mesh basket with lid, for sundry small items, with lid

Load carrier for MI instruments and reprocessing dental transmission instruments

E 902/1 mobile injector unit with drying connector

- Modular system for approx. 3 MI OP sets
- Accommodates up to 78 lumened instruments in 6 modules with integrated nozzles/adapters.
- Top and bottom levels free for mesh trays, e. g. E 142
Upper level:
H 64, W 595, D 780 mm
Lower level:
H 53, W 585, D 780 mm
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (incl. magnets)
- H 620, W 640, D 790 mm

Supplied as standard with:

- 3 x E 905/1 modular insert for short minimally invasive instruments
- 3 x E 906/1 modular inserts for long minimally invasive instruments
- 3 x E 444 insert/spiral rack for fibre optic cables or tubing
- 2 x E 445, 12 caps for E 442 irrigation sleeves
6 mm orifice
- 1 x E 446, 12 caps for E 443 irrigation sleeves,

E 905/1 modular insert

- For short MI instruments
- For up to 16 lumened instruments
- Sectioned for arthroscopes, laparoscopes etc.
- H 40, W 461, D 510 mm

Supplied as standard with:

- 1 x E 336 MIBO irrigation sleeves for pipettes/MI instruments, 11 mm, Length 121 mm
- 2 x E 362 blanking screws
- 1 x E 442 irrigation sleeve for MI instruments, Length 121 mm, 11 mm, with 6 mm cap
- 2 x E 447 adapters, female adapter for LuerLock, male
- 4 x E 448 silicone tube with LuerLock adapter, female
- 2 x E 449 male adapter, for female LuerLock
- 4 x E 452 injector nozzles, 2.5 x 60 mm
- 3 x E 453 injector nozzles, 4.0 x 110 mm with spring supports
- 3 x E 454 injector nozzles for trocar sleeves, 10-15 mm
- 1 x E 464 sleeve for E 454 injector nozzles
- 1 x E 907/1 insert / mesh tray with lid for small parts
- 1 x E 472 clamp for injector nozzle, 4 mm

Art. no. 69.5905.02

E 906/1 modular insert

- For long shafted MI instruments
- For up to 10 lumened instruments
- Sectioned for arthroscopes, laparoscopes etc.
- H 40, W 461, D 510 mm

Supplied as standard with:

- 2 x E 362 blanking screws
- 5 x E 442 irrigation sleeves for MI instruments
- 3 x E 443 irrigation sleeves for MI instruments, 8–12 mm
- 2 x E 448 silicone tubes with LuerLock adapter
- 1 x E 454 injector nozzles for trocar sleeves, 10-15 mm
- 2 x E 456 spring stays for MI instruments
- 1 x E 464 sleeve for E 454 injector nozzles
- 1 x E 908/1 insert for separable MI instruments/inner shafts
- 1 x E 336 irrigation sleeve MIBO

Mat. no. 6 943 250

Note

The modules can also be used on module units
E 574 (for G 7823/G 7824) and
E 774/1 (for G 7825/G 7826).

Module for E 902/3 for reprocessing dental instruments

Leading manufacturers recommend the reprocessing of transmission instruments in Miele thermal disinfectors.

KaVo. Dental Excellence.

Exclusive to Miele

E 919 dental module

- For connection of 10 turbines/hand-pieces and contra-angles as well as dental and ENT instruments
- Can be used on E 902/3 (new) as well as E 902/1, E 774/1, E 574, E 474/4
- Items should be reprocessed in the VARIO TD programme
- Cleaning should be performed using neutral to mildly alkaline liquid detergents
- Combination with MI instruments possible

Note: 10 AUF supplied. ADS must be ordered separately.

ROBOTVARIO X-tra – Centralised reprocessing of robotic-assisted instruments

A 502 load carrier with A 602 module and PG 8528 decontamination unit

Reprocessing with PG 8528

As a systematic approach to reprocessing robotic-assisted instruments, ROBOTVARIO enjoys great trust and confidence in specialist circles and is recommended by Intuitive Surgical Inc., manufacturer of robotic-assisted systems. Miele Professional has further optimised the process and now offers an increased load capacity and a modular load carrier system.

The new A 502 load carrier permits the use of the new ROBOTVARIO X-tra system together with various modules in centralised instrument reprocessing in hospitals. The load carrier is able to take up to 8 shafted instruments and 2 further special instruments, hold them securely and guarantee the thorough internal irrigation of all lumens. An additional row of nozzles ensures the targeted cleaning of the heavily soiled distal tips of instruments, particularly the fine crevices. Furthermore, the A 502 load carrier is also equipped with a micro-filter which prevents particulate deposits collecting inside instruments. Alongside the shafted and special instruments, the same load carrier can also accommodate further instruments such as the other utensils used in robotic-assisted surgery, e.g. trocar sleeves.

A 502 load carrier

- For use on PG 8528
- Reprocessing of up to 8 shafted instruments used in robotic-assisted surgery and 2 special instruments
- Holders for further instruments and accessories
- Micro-filter with 8 cm diameter
- H 466, W 640, D 790 mm
- Art. no. 69.6502.01
- Mat. no. 09530400

For use in A 502 load carrier:

A 600 module (not illustrated)

- For instruments used in robot-assisted surgery, older generations (S / Si)
- H 303, W 555, D 318 mm
- Mat. no. 10 131 910
- Art. no. 69.6600.01

A 602 module

- For instruments used in robot-assisted surgery, most recent generation (Xi)
- H 303, W 555, D 318 mm
- Mat. no. 10 131 930
- Art. no. 69.6602.01

A 805 connector (not illustrated)

- For special instruments, surgical staplers (Si)
- H 92, W 41, D 165 mm
- Mat. no. 10 131 950
- Art. no. 69.6805.01

A 806 connector (not illustrated)

- For special instruments with side flush port
- H 77, W 41 mm, D 165 mm
- Mat. no. 10 131 960
- Art. no. 69.6806.01

A 807 connector (not illustrated)

- For special instruments, forceps, older generation (S / Si)
- H 77, W 41, D 165 mm
- Mat. no. 10 131 980
- Art. no. 69.6807.01

A 502, fitted with A 602 module

The A 502 load carrier features a modular design, a sophisticated injector system and a microfilter for the thorough, particle-free cleaning of the lumens on shafted instruments.

Washer-disinfectors G 7823 und G 7824

The G 7823 and G 7824 washer-disinfectors were specifically designed to meet the needs of smaller and medium-sized hospitals and outpatient surgeries. With a width of only 900 mm, these machines are the ideal proposition in cases where space is at a premium. Depending on the installation site and hygiene requirements, machines are available as single-door front-loading models (G 7823) or as two-door barrier machines (G 7824) for installation in a diaphragm wall.

Flexible solutions for the central and decentral reprocessing of instruments

Miele's G 7823 and G 7824 washer-disinfectors offer a wide range of installation options, tailored individually to the needs of hospitals and outpatient surgeries. This allows units to be installed both **decentrally** in specialist departments or centrally in **CSSD** for coping with larger volumes of instruments.

Versions

- G 7823: Front-loading unit with single bottom-hinged door
- G 7824: Two-door barrier washer-disinfector for installation in a diaphragm wall

Design

- Stand-alone or side-by-side installation
- Width 900 mm
- Modular approach with customised features to meet individual requirements
- Single-chamber system for washing, disinfection and drying
- Service-friendly design
- Heater elements outside wash chamber
- Low heat and sound emissions thanks to double insulation

Capacity per cycle

- 8 DIN mesh trays or 3 DIN containers 150 x 300 x 600 mm or 1 DIN container 300 x 300 x 600 mm and 1 DIN container 150 x 300 x 600 mm or 3 AN sets or 2 MI sets

Cleaning technology

- Hygienic freshwater system with fresh water intake in each programme stage
- Cleaning, disinfection and drying in a closed, single-cabinet system
- 2 spray arms in cabinet for thorough cleaning of instrument surfaces
- Spray arms with high water impact force
- Full water jet access, ensuring optimum results
- Thorough cleaning of lumens thanks to injector system
- Direct docking of load carriers to water circuit

Infeed side

Outfeed side

Standard features

- 2 powerful circulation pumps
- Triple filtration with large surface filter, coarse filter and micro-fine filter
- Filters in inlet hoses
- Flowmeter to monitor water intake quantities
- 1 dump valve

Dispenser systems

- 2 dispenser pumps for liquid detergent and acidic agents
- Extendible (further 3 internal dispenser pumps retrofittable)

Water softeners

- High-capacity water softener (integratable)

Drainage

- 2 drain pumps

Controls

- Freely programmable controls PROFITRONIC
- 64 programme slots
 - 13 standard washing and disinfection programmes
 - 8 service programmes
 - 43 vacant programme slots
- User interface with local-language display
- Display of programme selection and programming dialogs, countdown time, faults and operating hours.
- Compilation of new programmes using machine controls or using PC/laptop via optical interface

Interfaces

- RS 232 serial interface for process documentation and remote service
- Optical interface for service and maintenance

Printer

- Integrated 6-pin printer to record key process parameters

Safety features

- Electric door lock
- Programme recontinuation in event of power outage
- Peak-load negotiation
- Optical and acoustic signal at end of programme
- 2 separate sensors for temperature monitoring and control
- Port for simple positioning of sensors in the wash cabinet for process validation
- Sensors in cabinet and a magnetic strip on load carriers for automatic assignment of programmes to load carriers

SBWR/3

Roller plinth/floor tray for G 7823

- Roller plinth/floor tray
- Castors allow machine to be pulled forward for servicing
- H 100, W 900, D 768 mm

TA-S1

Drying unit (optional)

- Hot-air drying unit (electrically heated)
- Low-maintenance three-phase motor with side-channel compressor
- Temperature range 60–115°C
- Time range 1-240 mins.
- 1 x pre-filter EU 4, Filter rating > 95%
Filter life 200 h
- 2 particulate filters H 13, Filter rating > 99.992%,
Filter life 500 h

SBW/4

Plinth/floor tray

- Frame with built-in floor tray
- Cut-outs for supplies and utilities
- A continuous plinth/floor tray can be provided on site when multiple machines are installed in a row.
- For G 7824
- H 100, W 900, D 768 mm

DK 23/24 steam condenser

- Steam condenser (heat exchanger)
- No water consumption when connected to on-site cooling water circuit, max. water pressure 8 bar

Machine versions, components, accessories

MAV 23/24

Top-box panelling

- Stainless-steel panelling with lockable service hatches to conceal steam condenser
- MAV without cover panel
- Panelling between top box and ceiling must be provided on site
- H 512, W 900, D 768 mm

Cover plate

- Top cover for MAV 23/24

DE 23 lid

- Lid for G 7823 when installed without steam condenser (not suitable for G 7824)

Retrofit kits

- OxiVario (OXI-NRS 1-G 7823/24)
- OrthoVario (ORTHO)

Retrofit kits and on-site installation by Miele Service

Note

An emergency door release must be fitted if the G 7824 is installed without top panelling (MAV). The required parts are available from Spares (cf. Conversion Instructions, Mat. no. 6476390).

Washer-disinfectors G 7825 und G 7826

In terms of size and capacity, G 7825 and G 7826 washer-disinfectors represent the mid-size range among the three Miele series catering for CSSD applications. The characteristic feature of this series is the high throughput capacity of up to 10 DIN mesh trays per cycle and an installation footprint of only **900 mm (width) x 750 mm (depth)**.

- Cleaning, disinfection and drying in a closed, single-cabinet system
- 2 spray arms in cabinet for thorough cleaning of instrument surfaces
- Spray arms with high water impact force
- Full water jet access, ensuring optimum results
- Thorough cleaning of lumens thanks to injector system
- Direct docking of load carriers to water circuit

Standard features

- 2 powerful circulation pumps
- Triple filtration with large surface filter, coarse filter and micro-fine filter
- Filters in inlet hoses
- Flowmeter to monitor water intake quantities
- 1 dump valve

Dispenser systems

- 2 dispenser pumps for liquid detergent and acidic agents
- Extendible (further 2 internal dispenser pumps retrofittable)

Infed side

Outfeed side

Water softeners

- High-capacity water softener (external)

Drainage

- 2 drain pumps

Controls

- Freely programmable controls PROFITRONIC
- 64 programme slots
 - 17 standard washing and disinfection programmes
 - 8 service programmes
 - 39 vacant programme slots
- User interface with local-language display
- Display of programme selection and programming dialogs, countdown time, faults and operating hours.
- Compilation of new programmes using machine controls or using PC/laptop via optical interface

Interfaces

- Serial RS 232 interface for process documentation and remote service
- Optical interface for service and maintenance

Printer

- Integrated 6-pin printer to record key process parameters

Safety features

- Electric door lock
- Programme recontinuation in event of power outage
- Peak-load negotiation
- Optical and acoustic signal at end of programme
- 2 separate sensors for temperature monitoring and control
- Port for simple positioning of sensors in the wash cabinet for process validation
- Sensors in cabinet and a magnetic strip on load carriers for automatic assignment of programmes to load carriers

Modular machine concept

Optional extras

Infeed side

Infeed side

SBW/2 Plinth/floor tray

- Frame with integrated stainless-steel floor tray
- Cut-outs for steam and plumbing connections, dump valve, dual drain valve and floor tray drain
- A single floor tray can be provided on site for machines installed in a row.
- Plinth fascia (front and rear) with 8 mm recess, flush at sides
- H 100, W 900, D 734 mm

SBWR/2 Roller plinth/floor tray for G 7825

- Roller plinth/floor tray
- Castors allow machine to be pulled forward for servicing
- For G 7825 with drain pump
- Utility supply access through ceiling
- H 100, W 900, D 734 mm

PRT/1 Printer for process documentation

- 6-needle printer and RS 232 serial interface
- Paper width: 58 mm
- For installation on infeed side of G 7825 or outfeed side of G 7826
- Recording of following parameters during programme:
Date and Mach. no., Prog. no., prog. name, starting and finishing time, dispensing concentration, dispensing temperature and pumps 1–4, target temperature reached (wash/dry) with times, all faults (e.g. 'water inlet'), all incidents of manual intervention (start, stop, power outage)
- Meets process parameters with respect to temperature and holding time

Machine versions, components, accessories

DK 25/26

Steam condenser/heat exchanger

- For G 7825/G 7826 with water cooling (only dehumidified air should be vented to air conditioning system)
- No water consumption when connected to on-site cooling water circuit, max. water pressure 8 bar
- Or cold water supply (water consumption)
- On-site installation
- Reduction of air discharge temperature to approx. 30-35°C
- Reduction in relative humidity to approx. 60-70%

MAV 25/26

Installation kit/Top-box panelling for steam condenser

- Service hatches, with lock, for both sides of diaphragm wall, stainless steel
- Ventilation grille on the infeed side
- Diaphragm wall panelling between the top of the top-box panelling and the ceiling must be provided on site
- H 430, W 900, D 750 mm

MVA Installation kit/Floor anchors

- 4 feet, fittings, plugs
- Required when machine is installed without SBW/2

OXI-NRS1 – G 7825/G 7826 OxiVario

OxiVario retrofit kit for machines from Serial no. 74305624 incl. on-site installation by Miele Service.

OXI-NRS2 – G 7825/G 7826 OxiVario

OxiVario retrofit kit for machines from Mach. no. 53078029 to Mach. no. 74305623, incl. OXI-NRS1 - G 7825/G 7826 and on-site installation by Miele Service.

DOS 10/30

Integrated dispenser pump

- For surfactant or neutralising agent, 10 ml/30 secs.
- Complete with hoses and siphon (330 mm) for 10 l canisters

DOS 60/30

Integrated dispenser pump

- For liquid disinfectant or detergent, 60 ml/30 secs.
- Complete with hoses and siphon (330 mm) for 10 l canisters

E 750 insert frame required for E 135 container for baby bottles.
(cf. Page 17)

E 775/2 load carrier

- Load capacity:
4 DIN mesh trays, 485 x 254 x 50 mm or
2 DIN mesh trays, 540 x 254 x 50 mm or
2 ISO mesh trays, 485 x 344 x 50 mm
- E 750 insert frame required for E 135 container for baby bottles.

E 735/2 load carrier

- Load capacity:
6 DIN mesh trays, 485 x 254 x 50 mm or
3 DIN mesh trays, 540 x 254 x 50 mm or
3 ISO mesh trays, 485 x 344 x 50 mm

A 7/1 insert

- Perforated plate
- 7 x 7 mm perforations
- 3 mm ridge
- For E 775/1, E 735/1 and E 701/1
- H 1, W 543, D 473 mm

- Loading dimensions:
- Level 4: H 87, W 488, D 546
 - Level 5: H 81, W 488, D 546
 - Load capacity:
 - 8 DIN mesh trays, 485 x 254 x 50 mm or
 - 4 DIN mesh trays, 540 x 254 x 50 mm or
 - 4 ISO mesh trays, 485 x 344 x 50 mm
 - Connection for hot-air drying unit
 - Magnetic strip for automatic load carrier recognition (excl. ML magnets)
 - H 461, W 530, D 600 mm

E 702 top module

- Level 5 for E 701/2 load carrier
- For 2 DIN mesh trays
- H 160, W 530, D 560 mm

Mat. no. 5 221 490
Art. no. 69.5702.01

Exclusive to Miele

- Max. load per mesh tray 10 kg

E 703/1 top module

- Injector module for E 701/2 load carrier
- For 7 lumened instruments
- H 170, W 80, D 555 mm

Mat. no. 7 025 350
Art. no. 69.5703.02

E 703/1 includes:

- 3 x E 362 blanking screws
- 2 x E 447 female adapter, for male LuerLock
- 2 x E 449 male adapter, for female LuerLock
- 4 x injection nozzles 4 mm, length 110 mm (Mat. no. 4175030)
- 3 x injection nozzles 4 mm, length 120 mm with spring support (Mat. no. 4398951)
- 3 x E 980 angled adapters

Inserts for shoes, kidney dishes, bowls

E 730 insert for 20 theatre shoes

- For E 550 and E 775/2 load carriers
- 20 holders, 280 mm
- For up to 20 pairs of theatre shoes, max. Size 44
- H 290, W 470, D 540 mm

Mat. no. 5 271 020
Art. no. 69.5730.01

E 484 insert 1/1 (empty)

- For various utensils
- 1.4 mm wire gauge
- Mesh size: 8 mm
- For holders
 - 4 x E 485 for 9 kidney dishes or
 - 4 x E 486 for 4 bowls or
 - 4 x E 487 for 16 theatre shoes or
 - 11 x E 489 universal holders e.g. for insoles

- Magnetic strip for automatic load carrier recognition (excl. ML magnets)
- H 575, W 530, D 600 mm

Load carriers for MI instruments

E 705/2 mobile injector unit with drying connector

- For MI instruments
max. length 600 mm
- Accommodates up to 42 lumened instruments
(22 connections to top and 20 sloping connections)
- Clearances from bottom:
Level 1: H 105, W 482, D 590 mm
Level 2: H 75, W 488, D 546 mm
Level 3: H 365, W 488, D 546 mm
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (excl. ML magnets)
- H 670, W 530, D 600 mm

Supplied as standard with:

- 3 x E 336 MIBO irrigation sleeves for MI instruments, 11 mm,
Length 121 mm
- 2 x E 362 blanking screws
- 15 x E 442 irrigation sleeves for MI instruments, 4–8 mm
- 5 x E 443 irrigation sleeves for MI instruments, 8–12 mm
- 1 x E 444 insert/spiral rack for fibre optic cables or tubing
- 1 x E 445, 12 caps for irrigation sleeves/MI instruments, 6 mm
- 1 x E 446, 12 caps for irrigation sleeves/MI instruments, 10 mm
- 3 x E 447 female adapters, for male LuerLock
- 6 x E 448 silicone hoses, 300 mm
- 5 x E 449 male adapter, for female LuerLock
- 1 x E 451 insert 1/6 mesh tray, H 55, W 150, D 225 mm

E 499 adapter

- Adapter for suction and irrigation cannulae with various connectors, and Verres cannulae
- Compatible with carriages with injector nozzles

Mat. no. 7 759 500

Art. no. 69.5499.01

- 3 x E 452 injector nozzles, 2.5 x 60 mm
- 8 x E 453 injector nozzles, with spring support, 4 x 100 mm
- 6 x E 454 injector nozzles for trocar sleeves, 10–15 mm
- 4 x E 456 spring stays for MI instruments
- 3 x E 464 adapter for E 454 injector nozzle for trocar sleeves, 20 mm
- 2 x E 472 clamp for injector nozzle, 4.0 mm
- 2 m silicone hose, 5 mm
Part no. 4822890

Mat. no. 7 029 810

Art. no. 69.5705.03

Load carrier for MI instruments and reprocessing dental transmission instruments

E 774/1 mobile injector unit with drying connector

- Modular system for 2-3 MI OP sets or dental transmission instruments
- For lumened instruments in 4 modules with integrated nozzles/adapters (not included)
- Applications:
 - E 903/1 module for MI instruments/urology
 - E 905/1 module for short MI instruments
 - E 906/1 module for long MI instruments
 - 3 x E 444 drums for lightguides and irrigation hoses
 - 1 x E 460 insert for rigid fibre optics
 - 1 x E 457 insert for separable MI instruments or
 - 1 x E 142 DIN mesh tray
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (excl. ML magnets)
- H 605, W 530, D 600 mm

Supplied as standard with:

- 4 x E 447 female adapters, for male LuerLock
- 6 x E 362 blanking screws

Mat. no. 7 040 190

Art. no. 69.5774.02

Load carriers for micro-instruments

Geuder AG recommends that their current range of instruments be reprocessed in a Miele washer-disinfector.

Geuder[®]
Precision made in Germany

E 729 load carrier with drying connector

- For 4–5 instrument sets (cataracts)
- Load carrier with 3 levels for micro-instruments and accessories
- 2 levels for 4 DIN mesh trays
- 1 level with 16 injector nozzles (with hose and male LuerLock) and 30 injector nozzles (15 male and 15 female LuerLock adapters)
- Connection for E 478 on feed pipe
- Vertical clearance (bottom to top):
 - Level 1: 124 mm
 - Level 2: 114.5 mm
 - Level 3: 160 mm
- Connection for hot-air drying unit
- Magnetic strip for automatic load carrier recognition (excl. ML magnets)
- H 471, W 530, D 600 mm

Supplied as standard with:

- 1 x E 476 adapter
- 1 x E 477 stopper
- 8 connectors LuerLock female/female (E 790)
- 8 connectors LuerLock female/male (E 791)

Mat. no. 6 517 580
Art. no. 69.5729.01
