# Design for life.

Built-in Appliances

# Our brand promise

Immer besser – Forever better

**"Immer besser" (Forever better)** – a credo chosen by our forefathers shortly after the company was founded. To be successful, it is important to stand apart from the competition. There are really only two ways to do this. Either to be better or cheaper. To be both at the same time will never be possible. We have opted for being better. This is the motto the Miele company has remained true to for more than a century now.

**"Forever better"** – for us, this means first of all that we want to offer our customers excellent quality and outstanding service. With regard to washing machines or tumble dryers, for example, first-class cleaning performance must go hand in hand with the most gentle treatment of textiles, glassware or porcelain. Food prepared in a conventional oven or steam oven should be an absolute enjoyment. All Miele appliances are characterised by excellent user convenience, economic operation and elegant design. Thanks to the response of Miele customers, which provides information on which improvements they require in various areas, we achieved our objective to offer products of the highest quality. In terms of domestic appliances, quality also stands for durability and dependability. This is why Miele is the only manufacturer who builds and tests all machines to last at least 20 years and ensures that the most important spares are available for more than 20 years.

**"Forever better"** – in this day and age this also means increasingly assuming social responsibility. Sustainability is a social objective which Miele is committed to. This includes primarily lowering electricity, water and detergent consumption but also a resource-saving production. We feel the same responsibility towards the people who work for us. As the first company in Germany, Miele was certified according to SA 8000, international social standards for fair working conditions and employment rights. Our suppliers and dealers are met with a spirit of partnership and mutual esteem. Sustainability has therefore many facets, and it is our aim to deliver excellence here too.\*

To become **"forever better"** has been our objective for over 100 years. We promise that this will not change.

*Markus Miele*      *Reinhard Zinkann*

# Rediscover the joy of cooking!

## Contents

On the next pages you will discover why Miele built-in appliances present special moments every day: with a modern design which stands the test of time, with functions that simplify every-day tasks and a quality that is a pleasure to work with for decades.

### Programs

Ovens	14-21
Combination oven-microwave	22-27
Steam ovens	28-33
Combination steam ovens	34-39
Microwave ovens	40-45
Drawers	46-51
Hobs and combi-sets	52-77
Cooker hoods	78-93
Coffee machines	94-101
Installation drawings	102-113
Why Miele?	
Sustainability at Miele	114-115
Miele quality	116-117
Miele customer service	118-123

Life has many facets; individual requirements and situations determine the demands on the environment we create around us. As a premium brand for domestic appliances, Miele guarantees perfect culinary delights, and with this comes quality of life. With this claim in mind, we design our appliances.

# Our philosophy

Design for the highest quality of life

## Design for life.

Design, in our eyes, does not only relate to an object's exterior but also to the operator's experience – functionality and aesthetics are mutually dependent. That is why our engineers and designers invested a lot of time and their entire know-how into the development of the new built-in kitchen appliances.

It results in products which, in terms of design, materials and functionality, match each other perfectly across the entire product range: this enables the new generation to take the topic of design homogeneity onto a completely new level. This design line in selected colours and materials can be perfectly integrated into any kitchen design.

**Reduced to basics**

Here, the focus is on using fewer materials. The high proportion of glass in the new design creates a calm feeling. Horizontal metal elements and an eye-catching handle which almost appears to be floating in front of high-quality glass elements in Obsidian Black, Brilliant White or Havana Brown. The horizontal design dominates; several appliances complement each other and form one continuous line.

# Individual designs - colours and materials

Choice between four colour options

## **Stainless steel**

Jet black glass creates an atmospheric background; the eye-catching stainless-steel handle becomes a prominent element. Both types of materials exist skilfully in harmony and on a par with each other. The horizontal design dominates; several appliances complement each other and form one continuous line.

**Obsidian Black**

Obsidian Black conveys a superior aesthetic design. Pure glass characterises machine fronts and achieves simple perfection. Light and shadows create reflections. This gives the appliance surfaces depth and elegance.

# Individual designs - colours and materials

Choice between four colour options

## **Brilliant White**

Colourful for creating exciting contrasts or unobtrusive for integration into white kitchens: Brilliant White combines minimalism with exclusiveness. This design emits a touch of levity and leaves room for exciting combinations.

### Havana Brown

The modern interpretation of a classic topic: Havana Brown complements the colour world. The right built-in kitchen appliances for people with a clear sense of harmony and sophistication.

# Precise controls and intuitive operation

M Touch – Selection at the touch of a fingertip and alternative user interfaces

**SensorTronic:** a 5-line TFT display with laterally positioned sensor controls presents menu content clearly. The simple user interface is a particularly characteristic feature.

**DirectSensor:** selecting an operating mode with a single touch of one of the symbols positioned to the left of the display. Touch elements to the right of the display navigate the operator through the different levels.

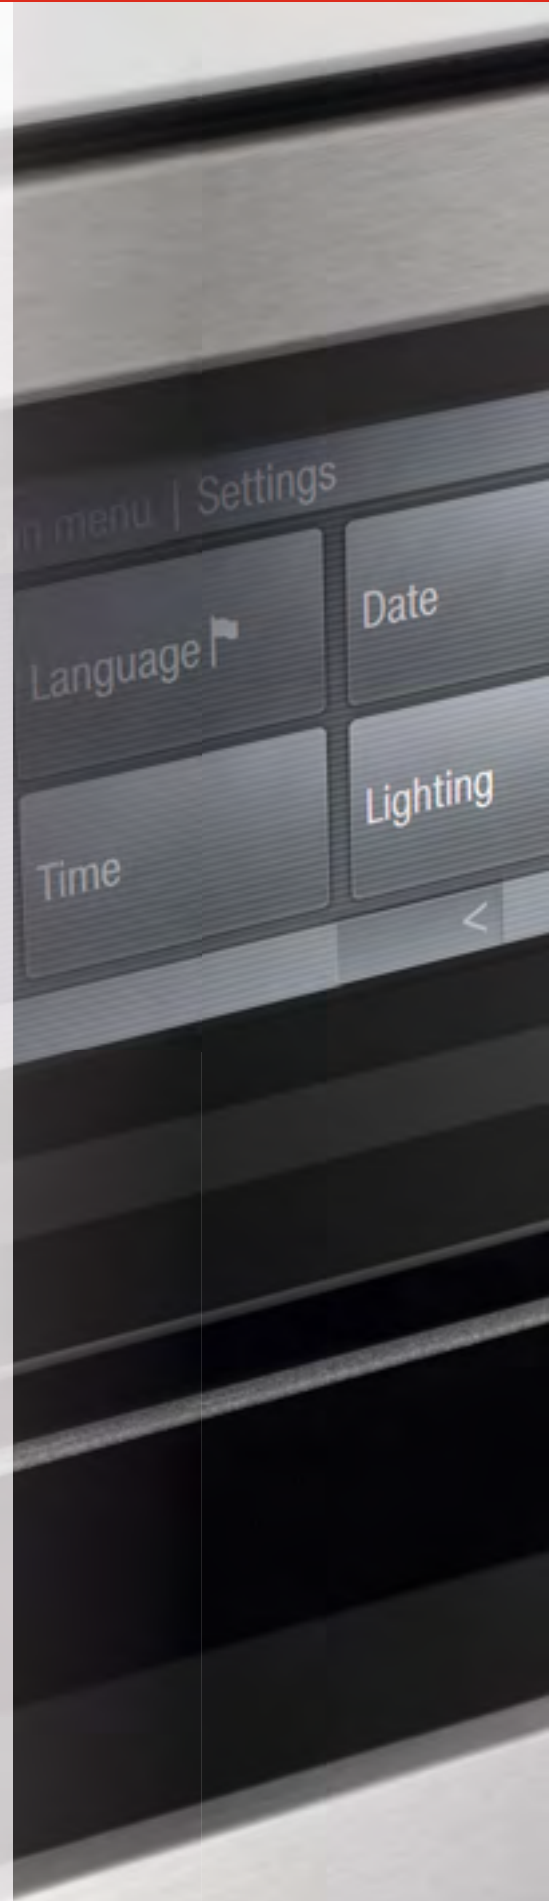

**DirectControl:** operating modes can be selected by turning the classic knob on the left hand side. Settings within the 4-line text display, such as temperature or time, are selected via the knob on the right hand side and confirmed with the sensor-touch controls.

**EasyControl:** controls are the same as the DirectControl user interface with one difference. Information such as temperature and time settings is provided in a 7-segment liquid-crystal display.

**EasySensor:** the minimalistic 7-segment display shows temperature and cooking time. Settings are selected and confirmed using integrated sensor-touch buttons.

**M Touch**

Achieving results fast with an innovative touch display: the new displays are as simple to operate and self-explanatory as smart phones. This display enables you to operate the appliances fast and intuitively by using touch controls or swiping the display. Many functions can be selected at a touch of a button. The central display in white ensures perfect visibility of information. Flagship models feature multi-colour displays.

# Directly below the hob or at eye level

Miele built-in oven models and niche dimensions

## Models

### Built-in ovens with hob controls

Ovens with hob controls are always combined with a hob and installed below a worktop. The controls for both the hob and oven are on the oven fascia panel.

### Built-in ovens

Wall ovens are installed independently of the hob and offer greater installation flexibility, for instance, they can be positioned at eye level for ultimate convenience.

## Niche dimensions

**Extra-large**  
90 cm wide, 48 cm high

**Compact**  
60 cm wide, 45 cm high

**Classic**  
60 cm wide, 60 cm high

# For individual preferences

Miele's cleaning systems and wide range of built-in ovens

## Range

Do you enjoy cooking large roasts or baking lots of biscuits? However consuming your love of cooking may be, Miele ovens offer you sufficient space!

**Extra-large: 90 l**

**Classic: 56 l**

**Large-capacity: 76 l**

## Cleaning systems

The food - simply delicious. But what about the cleaning? Miele offers two different cleaning systems which make cleaning extremely simple: PerfectClean and pyrolytic cleaning.

**PerfectClean**

**Pyrolytic cleaning**

**Pyrofit**

# Exclusive features for gourmet results

## Miele built-in oven product highlights\*

**Exclusive  
to Miele**

### **Moisture Plus**

Each type of food has its own specific properties. Knowing them and making the most of them is the true art of cooking. In the past, the baker held the monopoly on baking perfect bread and rolls. Now you can too: with a Miele oven with Moisture Plus. Increasing the humidity in the oven optimises cooking of a variety of foods: soft, delicious-smelling bread with a shiny, appetising crust; bread rolls and croissants as if from the local baker; succulent, tender meat with a nicely browned crust, perfect oven bakes, delicious soufflés and so much more.

**Exclusive to Miele** **Wireless food probe**  
Stress-free menu planning: precise temperature controlled cooking with the time remaining for the programme to run easily viewed in the display; supervising the process is no longer necessary.

**Exclusive to Miele** **FlexiClip runners**  
Flexible and safe: you can baste or turn meat outside the hot oven without the risk of getting burned.

**Automatic programmes**  
Conjuring up over 100 dishes with ease: bread, cakes or meat – automatically regulated cooking process.

**Exclusive to Miele** **Special applications**  
For rarely used food preparation methods: user convenience with various special programmes such as drying fruit.

**Exclusive to Miele** **Crisp function**  
For a crispy finish: Use dry heat when preparing some foods, such as pizza or French fries, you will achieve better results.

# As individual as you

Combination of two cooking functions on the smallest of footprints  
(microwave - combination oven)

The microwave combination oven combines the benefits of two powerful appliances into one, and fits into a 45 cm high niche: it is a fully-fledged oven with various operating modes including Fan Plus, and a powerful microwave.

You have the choice: you can use the functions separately, for example to bake delicious bread and cakes with the oven function or make a cup of hot chocolate with the microwave function. You can also use both functions together and save up to 30% time (compared to cooking without microwave power), depending on the dish.

# Exclusive features for gourmet results

## Microwave combination oven highlights\*

### Combination of microwave cooking modes

Versatile and time-saving: by combining microwave energy with conventional heating methods you can save up to 30% time compared to cooking without microwave power.

### Quick microwave

Full power at your fingertips: fast selection of microwave function via a separate sensor control.

### Automatic programmes

Conjuring up over 100 dishes with ease: bread, cakes or meat - fully automatic food preparation.

### Food probe

Stress-free menu planning: the time remaining for the programme to run can be easily viewed; supervising the process is no longer necessary.

**Exclusive to Miele**

### Popcorn button

At the touch of a button: fast and easy preparation of one packet of popcorn.

\* Depending on model

**Exclusive  
to Miele**

**Stainless-steel cabinet with PerfectClean finish and linen-weave pattern**

The cabinet of microwave combination ovens is made from stainless-steel with a linen-weave structure and PerfectClean finish. This surface finish makes it less susceptible to scratches and is considerably easier to clean than a conventional stainless-steel cabinet. The PerfectClean finish has excellent non-stick properties making it hard for soiling to stick to the oven interior during cooking.

# Stunning perspectives

## Miele steam oven designs

### Models

#### **Built-in steam ovens**

Thanks to its compact size, a Miele steam oven can easily be integrated into your kitchen design. At 60 cm wide, depending on model, it fits all standard niches, allowing you to choose the perfect location for yours.

#### **Freestanding steam oven**

If there is not enough space for another built-in appliance in your kitchen, you do not have to forego the benefits of a steam oven. The Miele freestanding steam oven sits perfectly on the kitchen worktop. Just like the built-in version, this appliance guarantees user convenience and a wide range of applications.

### Designs

#### **Steam ovens (without pressure)**

Miele steam ovens operate without pressure in the temperature range of 40 – 100°C. Ideal for vegetables, fish, side dishes, desserts and much more.

#### **Steam combination ovens**

Miele also offers steam combination ovens. See "Steam combination ovens" for more information about these appliances.

# Perfectly tailored to your requirements

60 cm wide, 45 cm high

**Freestanding**  
50 cm wide, 37 cm high

## External steam generation

In contrast to other manufacturers' systems, the steam generators of all Miele steam ovens are situated outside the cabinets. This gives considerable advantages for the cooking process: ideal steam quantity, optimum temperature, quantity-independent cooking times as well as rapid heating-up. And because limescale cannot build up in the oven cabinet, cleaning is quick and easy.

### **MultiSteam**

External steam generation for large cabinets.

### **MonoSteam**

External steam generation for small cabinets.

# Exclusive features for gourmet results

## Steam oven product highlights\*

**Exclusive  
to Miele**

### MultiSteam

Perfection to suit personal tastes - the Miele steam oven is an all-round expert and the perfect partner for an oven and a hob. As the cooking durations for steaming and boiling are identical, you do not have to change your cooking habits. You can make starters, soups, fish, meat, vegetables, side-dishes or puddings individually or as a complete meal in one cooking process. Individual preferences for cooking results – firm or tender, juicy or dry – can also be catered for with the Miele steam oven.

Thanks to Miele's MultiSteam technology, external steam generation ensures perfect results. 8 steam inlet ports enable fast generation of steam and steam distribution, short heat-up times and uniform cooking results.

**Exclusive to Miele** **Large cabinet with plenty of space**

Using the entire depth: cooking fish, vegetables and meat simultaneously and enjoying each one without the transfer of flavour.

**Exclusive to Miele** **Automatic menu cooking**

A complete menu: menu cooking automatically determines the temperature, cooking duration and sequence in which food is added.

**Simple cleaning**

No limescale: thanks to external steam generation cleaning is quick and easy.

**Automatic programmes**

Cook more than 150 types of food to perfection with ease: guaranteed results with fish, meat, vegetables and more.

**Cooking on three levels**

Saving time and electricity: simultaneous cooking of different types of food without the transfer of flavours.

# Stunning perspectives for your kitchen design

## Miele combination steam oven models and dimensions

### Designs

Miele offers steam combination ovens in two convenient designs. Whichever model you choose, you can look forward to delicious, healthy food.

The Miele 45 x 60 cm steam combination oven is the ideal addition to a conventional oven. In combination with a Miele 14 cm high Gourmet Warming Drawer, it fits into a 60 x 60 cm niche. This opens up untold cooking opportunities.

Would you like to find out more about drawers? Detailed information is available in the "Miele drawers" chapter.

#### Steam combination ovens

Miele steam combination ovens offer all the functions of 'steam only' ovens along with Fan Plus. By combining both dry and moist heat, perfect roasting and baking results can be achieved.

#### XL and XXL steam combination ovens

Miele XL and XXL steam combination ovens offer all the functions of 'steam only' ovens. They also feature all operating modes of a high-end conventional oven and, depending on the model, a food probe with or without a lead. Having additional combination options with moisture and a very large cabinet, the steam combination oven is a true all-rounder.

# Perfectly tailored to your requirements

## Miele steam systems and technologies

### External steam generation

In contrast to other manufacturers' systems, the steam generators of all Miele steam ovens are situated outside the cabinets. This gives considerable advantages for the cooking process: ideal steam quantity, optimum temperature, quantity-independent cooking times as well as rapid heating-up. And because limescale cannot build up in the oven cabinet, cleaning is quick and easy.

**Exclusive to Miele** **MultiSteam**  
External steam generation for large cabinets.

**MonoSteam**  
External steam generation for small cabinets.

# Exclusive features for gourmet results

## Steam combination oven highlights\*

**Exclusive  
to Miele**

### MultiSteam

Perfection to suit personal tastes - the Miele steam oven is an all-round expert and the perfect partner for an oven and a hob. As the cooking durations for steaming and boiling are identical, you do not have to change your cooking habits. You can make starters, soups, fish, meat, vegetables, side-dishes or puddings individually or as a complete meal in one cooking process. Individual preferences for cooking results – firm or tender – can also be catered for with the Miele steam oven. Thanks to Miele's MultiSteam technology, external steam generation ensures perfect results. 8 steam inlet ports enable fast generation of steam and steam distribution, short heat-up times and uniform cooking results.

**Exclusive to Miele** Fully fledged steam oven, conventional oven, steam combination oven

3 in 1: achieving perfect cooking, roasting and baking results with unlimited combination options.

**XL cabinet**

Ample space: complete meals can be prepared simultaneously for up to 10 persons; sufficient room for poultry or a whole fish.

**Exclusive to Miele** Motorised lift-up fascia panel

Convenient: the panel opens at the touch of a button to reveal the water container, condensation container and food probe.

**Combination cooking**

Crispy on the outside, succulent on the inside: combination of, for example, moist and hot air for excellent baking and roasting results.

**Exclusive to Miele** Wireless food probe

No supervision necessary: the countdown indicator provides precise information on when meat, fish or poultry is ready.

# As individual as you

## Miele microwave oven models

### Models

#### **Miele built-in TopControl appliances**

Miele microwave ovens with controls positioned at the top offer excellent user benefits. Their design allows them to be installed in combination with any other Miele appliance in the kitchen - fleet design in perfection. The glass door opens downwards at the front – as on the ovens. As the controls are positioned conveniently at the top, more space is available for the cabinet.

#### **Freestanding**

No niche space for a built-in microwave oven? Then a Miele freestanding microwave oven is the right appliance for you: simply place it on the worktop.

### Niche dimensions

45 cm high  
60 cm wide

# The ideal solution for your kitchen

Miele's wide range of microwave ovens

## Range

Miele offers microwave ovens to suit available niche dimensions. They are suitable for a main course or a snack!

26 l cabinet

46 l cabinet

## Operating modes

Anyone who thinks that microwave ovens are only for heating up and defrosting is in for a culinary awakening; be surprised by the broad range of options available with Miele microwave ovens in daily use.

Solo microwave oven

Microwave ovens with integrated grill

# Miele highlights for perfect results and more convenience

The product highlights\* of Miele microwave ovens

## **XL cabinet**

The spacious stainless-steel cabinet with TopControl can accommodate larger items and quantities, and cook, for example, roast chickens or oven bakes to perfection. The turntable with 40 cm diameter allows a particularly flexible use of different cooking containers or several containers, cups or plates simultaneously. Food preparation on a larger scale.

#### **40 cm turntable**

Plenty of space: perfect for several glasses, cups, plates or containers of various sizes.

#### **LED lighting**

High-quality and durable: LEDs place your food in the spotlight during preparation.

#### **Popcorn button**

At the touch of a button: fast and easy preparation of one packet of popcorn.

#### **Quartz grill**

Fast and uniform results: all dishes are browned perfectly in a short time.

#### **Automatic programmes**

Conjuring up dishes with ease: simply select the appropriate programme and the weight of the food to be cooked - the appliance will do the rest.

# Perfectly tailored to your requirements

## Miele warmer drawers

### Designs

Miele offers built-in models to suit various installation situations and niche sizes. Alongside the benefits of a crockery warming drawer, the large Gourmet warming drawer also offers the options of keeping cooked food at serving temperature or, with the low-temperature function, can be used to cook meat and other food gently and perfectly.

**Gourmet warming drawer -  
14 cm high**

**Gourmet warming drawer -  
29 cm high**

# The perfect complement to ovens, steam ovens and coffee machines

Miele's wide range of drawers

## Range

### **The classic drawer - 14 cm high, 60 cm wide**

Gourmet warming drawers are available in medium height. They can be combined perfectly with a 45 cm high compact appliance such as a Miele coffee machine, a steam oven, a steam combination oven or a microwave combination oven in a 60 cm niche. To enable you to install these drawers with various appliance designs, these drawers are offered in a choice of front designs.

### **The extra-large drawer - 29 cm high, 60 cm wide**

The 29 cm high built-in Gourmet warming drawer is the largest drawer from Miele (also for pre-heating crockery). In combination with a conventional 60 cm high oven, it teams up perfectly in an 88 cm niche.

# Exclusive features for gourmet results

Miele built-in drawer product highlights\*

**Exclusive  
to Miele**

**Low-temperature cooking brings out the best in any type of meat**

Low-temperature cooking is a professional method of food preparation giving high-quality, tender results with meat. Meat retains its aroma and nutrients exceptionally well and good chefs have been using this type of cooking method for many years to prepare tender food. It is now becoming increasingly popular in domestic households. Low-temperature cooking is stress-free as the cooking process does not require monitoring and other preparations can be carried out without any time pressure. And because the meat juices are evenly distributed during cooking, the meat can be carved straight after cooking without the need to rest it first.

#### 4 operating modes

Multi-purpose use: for warming cups and glasses, plates and dishes, for keeping food at serving temperature or for using the low temperature function to cook your food.

**Exclusive to Miele**

#### Touch controls

Simply convenient: programme selection is via a flush touch panel which is easy to clean.

#### Timer

Heat guaranteed: all built-in food warming drawers feature a 4-hour timer which switches the appliance off automatically.

#### Automatic buffered self-closing feature

Gentle and quiet: a special buffer allows the warming drawer to close gently.

#### Fully telescopic runners

Simply practical: the drawer can be pulled out completely for easy loading and unloading.

# Perfectly tailored to your requirements

The designs, models and range of Miele gas hobs

## Designs

### Gas hobs

Miele gas hobs have onset controls and do not have to be installed above an oven. The space underneath the hob can be used, if wished, for drawers or cupboards, giving you more flexibility when planning your kitchen.

## Models

### Gas hobs

Gas is a primary source of energy. Primary energy comes from natural, unrefined sources which can be used without conversion. That is why cooking with gas is particularly environmentally friendly. Cooking with gas has a long tradition. The first gas stoves and cookers started appearing on the market in the 19th century, long before electric appliances made their mark.

## Range

**Classic**  
60 cm wide –  
hobs with 4 burners

**Practical**  
75 cm wide –  
hobs with 5 burners

**Large**  
90 cm extra  
wide hobs with 5 burners

# The right frame for your kitchen design

## Miele gas hob designs and control technologies

### Designs

**Classic** – gas hobs with stainless-steel trough

**Integrated** – flat-fit gas hobs with stainless-steel trough

**Elegant** – gas on glass

### Control technologies

#### Gas hobs without electronic controls

All Miele gas hobs sport the GasStop safety feature. In the event of flame failure, the gas supply is switched off immediately, preventing the continued supply of gas.

#### Gas hobs with electronic controls

QuickStart ensures fast ignition and GasStop&ReStart automatic re-ignition in the event of flame failure. Some hobs also feature a minute minder and a residual heat indicator.

# Exclusive features for gourmet results

## Miele gas hob product highlights\*

### ComfortClean pot rests

Fast cleaning: simply remove the pot rests and clean them in a dishwasher. This results in gas hobs looking good for longer.

### Individual design

Attractive designs to suit all tastes: puristic stainless-steel look or elegant ceramic glass.

### Enamelled pot rests and burner parts

Nothing lasts longer and is easier to clean: enamelled cast-iron pot rests and burners with PerfectClean.

### QuickStart

No need to press or hold control: convenient rotary electronic controls to switch burners on.

### GasStop & ReStart

Safe cooking: extinguished gas flames are automatically re-ignited. Should this prove unsuccessful, the gas supply is turned off immediately.

\* Depending on model

**Gas hobs with electronic controls**

Miele gas hobs with electronic controls offer even more safety and convenience: QuickStart ensures fast ignition and GasStop&ReStart automatic re-ignition in the event of flame failure. Some of these gas hobs also feature a minute minder and a residual heat indicator.

# Perfectly tailored to your requirements

The designs, models and range of Miele CombiSets

## Designs

### CombiSets

CombiSet elements can be installed in a kitchen worktop in a combination to suit you. Depending on model, the space below the CombiSet units can be used for drawers or cupboards instead of the oven, giving you more flexibility when planning your kitchen.

## Models

### Conventional electric hobs

Cooking zones are heated by heater elements below the ceramic surface which glow red when active. Electric CombiSet hobs, just like traditional electric hobs, feature various cooking zone sizes.

### Induction hobs

With induction cooking, the heat is generated directly in the pan base. The size of the pan is also recognised with the advantage that practically no energy is lost. Cooking is particularly safe as the areas surrounding the cooking zones stay relatively cool. Miele appliances also offer a number of high-end features for added user convenience.

### Gas hobs

Powerful or gentle cooking: both are possible with a Miele gas hob. Available in a variety of widths with a range of features, the electronically controlled CombiSet gas burners also offer innovative safety features and user benefits.

## Range

Do you cook with only a few pans or do you like to conjure up lavish meals with lots of pots and pans? Miele offers two CombiSet appliance widths which can be combined to create your personal cooking space.

**Classic** – 288 mm wide

**Practical** – 380 mm wide

You can select the appliances that suit your requirements to create your personal cooking space and have sufficient space for your crockery.

# Cooking with the unusual

Exotic cooking with Miele CombiSets

## Induction wok

The Miele wok pan fits perfectly into the depression of the ceramic hob which results in optimum heat distribution. The wok's intelligent ControlInduc® system reliably prevents overheating of oil and fat. The Miele induction wok offers special user benefits such as booster technology.

## Barbecue grill

Meat, fish or vegetables prepared on the grill are particularly tasty. Two separate grill zones with independent controls allow you to grill and keep food warm at the same time. Guaranteed to suit personal tastes: using the grill with water will make your food even more succulent. Using lava rock will give food the authentic aroma of an outdoor barbecue.

## TepanYaki

Food is cooked directly on the hot stainless steel surface. Miele's TepanYaki has two separate heat zones: this allows you, for example, to cook food with different heat requirements at the same time, or to cook at the front and keep food warm at the back.

## Deep fat fryer

If you love crispy, juicy specialities, then the deep fat fryer is for you. The 'temperature reached' indicator, shows when the target oil temperature has been reached, for safe preparation and optimum cooking results. This prevents the build-up of acrylamides. The deep fat fryer can also be used with water in the optional pasta insert for cooking your favourite pasta dish.

## Salamander grill

The salamander grill is a genuine all-rounder from the commercial kitchen. It is ideal for caramelising, gratins and browning toppings. Functional highlight: Miele's motorised salamander grill appears at the push of a button and disappears back into the worktop when no longer needed. Special order only!

# Exclusive features for gourmet results

## Miele CombiSet product highlights\*

### Appliance widths

A wide range is standard: two different widths allow you to mix and match to suit your needs.

### Stainless-steel frame

Uniform frame design: no matter which CombiSet units are installed in combination, they always match each other perfectly.

### Knobs

Matching convenience: metal knobs\* complement the matching design of the CombiSet elements.

### Inclined control panel

Perfect look: the ergonomically arranged control panel simplifies operation.

### Indicators

Safe and effective: a display with up to three indicator modes.

\* Depending on model

Miele CombiSet appliances emanate style and convenience. Despite each appliance working independently of the others, all look as if they go together. Installed next to each other, they create a uniform and elegant ensemble. A design highlight in any kitchen!

# Stunning perspectives for your kitchen design

## Miele cooker hood designs

### Models

#### Wall and island cooker hoods

An eye-catcher in your kitchen

78 Wall mounted cooker hoods

Island cooker hoods

#### Ceiling extractors

Integrated for an unobstructed view

Ceiling extractors

**Downdraft systems**  
For integration in work tops

**Built-in cooker hoods**  
The right solution for every home!

Slimline hoods

Integrated extractor units

Built-under hood

# The ideal cooker hood for your hob

## Miele cooker hood widths

### **Cooker hoods for small and medium sized kitchens**

Available in the following widths:

- 60 cm wide
- 70 cm wide
- 90 cm wide

### **Cooker hoods for large and open plan kitchens**

Available in the following widths:

- 90 cm wide
- 100 cm wide
- 110 cm wide
- 120 cm wide
- 150 cm wide

### **For kitchens with a professional appeal**

Available in the following widths:

- 150 cm wide
- 180 cm wide
- Special widths all available on request

# The perfect micro-climate

## Miele cooker hood operating modes

During cooking, and in particular when frying, vapours are given off which consist of a mixture of steam, particles of fat and odours. If air in the room is not extracted or filtered, these vapours will remain in the room and affect the kitchen environment. Over a period of time this will affect the kitchen furniture, soft furnishings, paintwork etc. as this is where grease and vapours settle. There are three options for cleaning the air effectively: extraction mode, air extraction with an external motor and recirculation mode.

**Extraction mode** – highly efficient and dehumidifying

**Extraction mode** with an external motor – effective and particularly quiet

**Recirculation mode** – simple and efficient

# Exclusive features for clean room air

## Miele cooker hood highlights

**Exclusive  
to Miele**

### **Con@ctivity – Automatic function for Miele cooker hoods**

Achieving optimum extraction of kitchen vapours and odours and saving energy at the same time: a Miele cooker hood equipped with the Con@ctivity function does this automatically. Miele Con@ctivity enables the cooker hood to communicate with the hob. Information gathered from the hob is transmitted to the cooker hood. The cooker hood then uses this data to automatically select the correct fan setting to ensure the optimum room climate at all times. This leaves you free to concentrate fully on your cooking. You don't even have to worry about switching the appliance off with Con@ctivity. With the automatic run-on control, the cooker hood will switch off automatically after you have finished cooking so you do not use any more energy than is necessary.

Con@ctivity

**Exclusive to Miele** **NoSmell active charcoal filter**

Efficient in absorbing odours: in recirculation mode odours are absorbed and neutralised completely.

**Stainless steel grease filters**

Convenient cleaning: the high-quality metal grease filters are dishwasher-proof and extremely durable.

**Miele's acoustic package**

Efficient and very quiet: the fan is effectively insulated with special soundproofing mats.

**Miele CleanCover**

Protection and ease of cleaning: the smooth surface conceals and prevents contact with electrical components and the motor.

**Customisation on request**

Many cooker hoods are available to special order so you can choose the width and height, or even have the angle at the top of the chimney tooled to suit the angle of your ceiling.

**\* Please note :**

- It is advisable to install the KM6379 with the DA6890 downdraft extractor fan.
- It is not recommended to combine a gas hob/ gas combi-set with the DA6890 downdraft extractor fan.

# Tried and tested systems for exquisite taste

Miele coffee machines

## Preparation systems

### **Coffee bean machines**

Do you like to choose your personal favourite amongst all types of coffee beans available on the market and enjoy the aroma of freshly ground beans? Then this is the system for you. You can adjust all machine settings to suit your beans and your taste.

# The right size for every kitchen

Miele's wide range of coffee machines

## Miele coffee machine range

### **Built-in coffee bean machines**

This machine fits perfectly into a 45 cm high niche in a tall unit. In combination with other Miele built-in appliances – vertically or horizontally – it creates a uniform appearance. This machine is also available as a plumbed-in version.

### **Freestanding coffee bean machine**

The compact Miele free-standing coffee machines are at home anywhere in your kitchen, living room, vacation, or wherever you want to enjoy aromatic fresh coffee at the push of a button.

# Miele highlights for perfect coffee

The product highlights\* of Miele built-in coffee bean machines

## **OneTouch and OneTouch for Two**

Fully-automatic perfection: preparation of one or two coffee specialities at the touch of a button. The OneTouch for Two function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be made at the same time.

Using the OneTouch function and pressing the button twice produces two hot beverages in succession in one process. Hot beverages are delivered conveniently via the central spout. Glasses and cups no longer need to be moved around.

#### **AromaticSystem**

Intensive coffee aroma: intelligent technology to achieve best possible results.

**Exclusive to Miele**

#### **CupSensor**

Ideal distance: the unique CupSensor recognises the rim of the cup and alters the position of the central spout accordingly.

**Exclusive to Miele**

#### **EasyClick milk system**

Innovative and only available from Miele: the convenient milk system simply clicks into place at the front and is as easily removed.

**Exclusive to Miele**

#### **Automatic rinsing of milk lines with water from the water container**

Excellent user convenience: after the preparation of coffee specialities with milk, the appliance is automatically rinsed.

**Exclusive to Miele**

#### **ComfortDoor\*\* - patented door system with wide-opening hinged front**

Easy access: convenient access to bean container, water container, grounds container and drip tray.

\* Depending on model

\*\* DE 19701033C2 EP 0783859B1

# Our highlights for perfect coffee

The product highlights\* of Miele freestanding coffee bean machines

## **AromaticSystem**

Intensive coffee aroma: intelligent technology to achieve best possible results.

## **Cappuccinatore**

Minimum effort required: hot milk or creamy milk froth is delivered straight to the cup, glass or coffee pot.

## **Automatic rinsing of milk lines with water from the water container**

Excellent user convenience: after the preparation of coffee specialities with milk, the appliance is automatically rinsed.

## **Easily removable brew unit**

Easy to remove and clean: a guarantee for impeccable hygiene, longevity and perfect coffee enjoyment.

## **ComfortClean**

Thorough cleaning: many components are dishwasher-proof.

\* Depending on model

**OneTouch and OneTouch for Two**

Fully-automatic perfection: preparation of one or two coffee specialities at the touch of a button. The OneTouch for Two function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be made at the same time. Using the OneTouch function and pressing the button twice produces two hot beverages in succession in one process. Hot beverages are delivered conveniently via the central spout. Glasses and cups no longer need to be moved around.

## Cooker hoods

DA 1060

To built-under cupboard or wall mount on brackets

DA 3460

- 1) The front section of the wall housing unit must be fitted with a shelf to the depth of the partition wall. If the appliance is fitted further back, e.g. to accommodate a front panel, then the shelf depth should be correspondingly deeper.
- 2) The partition wall in the wall unit must be removable.
- 3) In extraction mode: when measuring for the height of the wall housing unit and the cut-out, account must be taken of any accessories fitted, e.g. silencer, DSM module.
- 4) Recirculation mode requires installation kit DUU 151.
- 5) Installation with drop-down frame DAR 3000: account must be taken of differing cupboard heights.

DA 3490

- 1) The front section of the wall housing unit must be fitted with a shelf to the depth of the partition wall. If the appliance is fitted further back, e.g. to accommodate a front panel, then the shelf depth should be correspondingly deeper.
- 2) The partition wall in the wall unit must be removable.
- 3) In extraction mode: when measuring for the height of the wall housing unit and the cut-out, account must be taken of any accessories fitted, e.g. silencer, DSM module.
- 4) Recirculation mode requires installation kit DUU 151.
- 5) Installation with drop-down frame DAR 3000: account must be taken of differing cupboard heights.

DA 2170

\* Cut-out dimensions

A depth T of at least 25 mm must be provided at the back of the building-in niche.

# Installation drawings

## DA / Ext Ceiling Extractor

- ① Suction side
- 2) Motor can be rotated. Exhaust socket can be fitted at the top or the sides in any direction
- 3) The motor unit can be freely positioned. Connection to the appliance is via the exhaust ducting and the connection cable.
- 4) If the cooker hood is being installed near to a wall, a min. distance of 50 mm must be observed.

## DA 410-4

- 1. Cut-out for mains cable and extraction ducting
- 2. Extraction
- 3. Recirculation
- 4. Ventilation grille for recirculation

## DA 420 Vario / Ext Island Extractor

- ① Cut-out for exhaust ducting, mains cable and EXT connection cable.
- 2) Air extraction (delivered in this mode as standard).
- 3) Height range for appliance in recirculation mode.
- 4) Height range for appliance in extraction mode.
- 5) Ventilation grille at the top for recirculation.

## DA 424 Vario / Ext Island Extractor

- ① Cut-out for exhaust ducting, mains cable and EXT connection cable
- 2) Factory default
- 3) Height range

## DA 5100 D / Ext Island Extractor

- ① Cut-out for mains cable, EXT connection cable and exhaust ducting

## DA 5100 DU Island Extractor

- 1) Cut-out for mains cable, EXT connection cable and exhaust ducting

## DA 6690 D Island Extractor

- ① Installation cut-out
- 2) Extraction
- 3) Recirculation
- 4) Installation option with spacer frame
- 5) Ventilation grille at the top for recirculation
- 6) A mains cable and, for extraction mode, flexible exhaust ducting is required from the ceiling connection to the connection on the cooker hood.

## DA 424-4 Island Extractor

- ① Possible positions for cable outlet, EXT cable and extraction ducting

## DA 5005 D Island Extractor

- ① Possible positions for cable outlet, EXT cable and extraction ducting

DA 6296 W / Ext Wall Extractor

- ① Extraction
- 2) Recirculation
- 3) Ventilation grille at top for recirculation
- 4+5) Installation cut-out (5 not requested for recirculation)

DA 289-4 / Ext Wall Extractor

- ① Installation cut-out
- 2) Position for the ceiling vent cut-out
- 3) Safety distance between the cooker or hob and the cooker hood canopy must measure at least 365 mm

DA 396-6 Wall Extractor

- ① Extraction
- 2) Recirculation
- 3) Ventilation grille at top for recirculation
- 4+5) Installation cut-out (5 not required for recirculation)

DA 399-6 Wall Extractor

- ① Extraction
- 2) Recirculation
- 3) Ventilation grille at top for recirculation
- 4+5) Installation cut-out (5 not required for recirculation)

DA 5496 W Wall Extractor

- ① Extraction
- 2) Recirculation
- 3) Ventilation grille at top for recirculation
- 4+5) Installation cut-out (5 not required for recirculation)

# Ecological responsibility

At the heart of everything we do

The responsibility for our environment has been a long tradition at Miele for more than 110 years. Our natural environment is the foundation of our existence which we want to protect, for us and generations to come to have a good future. True to our motto "Forever better", we develop domestic appliances for customers, which reduces the burden on the environment and natural resources. This begins with the selection of materials, ensuring efficient production and ends, after a long machine life, in environmentally friendly recycling.

Our environmental standards pay their way in the long run: Miele's highly efficient domestic and built-in appliances ensure excellent performance and set standards in terms of low water and electricity consumption values too.

This coral logo represents the sustainability of Miele products. The fascination for coral lies in the dimensions of coral systems: from large coral reefs measuring many square metres down to millimetre-sized tentacles. Sustainability is perceived to work similarly: from global responsibility to technical details which contribute to saving resources and reducing the burden on the environment.

More on our efforts in terms of sustainability  
on [www.miele.co.za](http://www.miele.co.za)

# Miele quality

Forever better

Miele stands for quality, innovation and internationally recognised product developments. Miele is a worldwide established premium brand and highly valued. The foundation for this success was laid by the founders Carl Miele and Reinhard Zinkann. With their guiding motto of being 'Forever better', still valid to this day, they condensed the company's corporate philosophy to: "Success can only be had in the long run if one is totally and utterly convinced of the quality of one's products." The family-run Miele company has always kept this promise during the 110-year history of the company and, in doing so, has helped to achieve a unique position worldwide within its branch of industry.

**Quality**

First-class technology, best functionality and excellent durability – these values define Miele products as real premium appliances. Since the company was founded, Miele has been proving its competence with regard to perfect domestic appliances and hygiene. Miele appliances are highly reliable. This claim is endorsed by our in-house laboratory tests and then over many years in your home.

# Miele Home Demonstration

Individual product advice in the comfort of your own home

Miele machines are of high quality and innovation – by purchasing Miele, you have opted for the best. To ensure enjoyment and long-term satisfaction with your appliances and a multitude of functions, we would like to introduce you to an attractive offer: Miele's Home Demonstration. This service is tailored to suit your exact needs. You receive extensive advice on the functions and optimum use of your own Miele appliances in your own home.

Together we will programme your machines to suit your personal needs. We will explain specific features and give you advice on maintenance and operation. We also show you how you can achieve the best results and give you valuable tips to ensure that you can enjoy your appliances for a very long time. Please contact your nearest Miele Centre for more information; regarding bookings and terms and conditions.

**Miele Service Certificate  
Up to 10-year Miele extended warranty**

**Exclusive Miele extended warranty for 10 years**  
Miele is the only manufacturer to offer a comprehensive extended warranty for up to 10 years.

**Maximum safety**  
During this extended warranty period, there will be no repair charges for faults, unless caused by wrongful intent or gross negligence.

**Reliable and fast**  
In the event of repair, our highly-skilled service technicians will provide fast and reliable help.

Further information on these topics are available from our website ([www.miele.co.za](http://www.miele.co.za)) or Miele Centre's.

# Miele in-house service

Professional care, functional tests and repair

### **Miele in-house service**

#### **Your partner for prompt servicing**

When you buy a Miele appliance you choose longevity and the best in quality. If, however, you require any help, Miele Service can provide rapid and reliable assistance. The quality of Miele Service is regularly checked by customer surveys and is also confirmed by independent institutes.

Miele defines perfect service as more than simply providing expert service in the event of technical problems. Miele provides support right through from installing the machine to any matters concerning the use of appliances.

Further information on these topics is available from our website ([www.miele.co.za](http://www.miele.co.za)).
