

Miele

PRICING BROCHURE 2020
SECOND EDITION
01 AUGUST - 31 DECEMBER 2020

OUR PLEDGE

IMMER BESSER

WELCOME TO MIELE

When our great grandfathers founded the Miele company, they had to make sure they stood apart from the competition in order to be successful. There are effectively only two ways of doing this: either by being cheaper than the rest or by being better than the rest. It is not really possible to be both at the same time. They decided to be better than the rest.

Numerous best in class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "Immer besser" (forever better) throughout the past 120 years. However, the millions of satisfied customers around the world are perhaps the most important endorsement. At the heart of this success lies a continuity of values and goals which are typically only found in companies which have been family-run for generations.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours.

Buying a Miele is an environmentally friendly decision. We ensure this by using methods of production that save resources as well as by producing appliances which set new standards in terms of their consumption of electricity, water, and detergent – and save you money at the same time.*

As directors and co-proprietors of the fourth generation of our business we promise you that this will not change.

Your

Markus Miele

and your

THERE ARE MANY GOOD REASONS FOR CHOOSING MIELE.

Here are just six of them. Since the company was founded in 1899, Miele has remained true to its “Immer Besser” brand promise. This means that we will do all that we can to be forever better than our competitors and forever better than we already are. For our customers this means the peace of mind of knowing that choosing Miele is a good decision – and probably the decision of a lifetime!

MIELE QUALITY

For more than 120 years perfect results have been imperative to us: You can rely on Miele. We are the only manufacturer in our branch of industry to test products such as our washing machines, tumble dryers, dishwashers, and ovens to the equivalent of 20 years' use.

We can thereby offer you unique reliability and peace of mind. This explains why Miele customers around the world remain true to their brand and recommend Miele to others. Looking to the future, we will not entertain any compromises when it comes to the reliability and durability of our appliances.

MIELE TECHNOLOGY

Miele stands for fascinating technology and excellent results combined with minimum energy consumption. This applies to the hygienic and gentle care of your laundry, your flooring and your crockery as well as when conjuring up exquisite culinary delights. The key to this is a wealth of innovative features available only from Miele. This is borne out by numerous first places in leading product tests conducted around the world.

MIELE CRAFTSMANSHIP

Miele stands for true craftsmanship, combining vision, precision and a great deal of attention to detail. Each of our products is manufactured to the highest standard and is subject to stringent quality controls including individual surface tests with gloves. From handles milled from a single piece of metal to matching gap dimensions across all product groups, each element is part of our journey to absolute perfection. Nothing is more important to us than that you enjoy Miele for a long time.

MIELE SERVICE

Miele customers enjoy preferential treatment: thanks to our fast and efficient after-sales service operation. If you need personalised instructions on appliance use or professional cleaning of your appliances, Miele will gladly visit you at home. We will always be there for you. That's a promise!

MIELE BRAND

In many countries Miele is the most desired brand in its branch of industry. In its German home market, Miele was even voted

'best brand ever' across all product branches. And the ownership of products from such a brand reveals much about its users: Miele customers have high expectations for the performance and the environmental friendliness of their domestic appliances. People who buy Miele are quality conscious and have style!

MIELE DESIGN

Miele believes in clean lines, timeless elegance and intuitive handling. Whether conventional rotary switch, discreet sensor controls or a high-resolution touch display: operating a Miele is both easy and fun. Nowhere else will you find such a comparable range of carefully coordinated design lines and colour options, to suit the most diverse kitchen furniture fronts. Whatever the style of your kitchen: Miele is the perfect match.

Warranty Packages

Symbols for warranty packages at a glance

Warranty Packages

Exclusive Miele extended warranty for up to 10 years

By purchasing a Miele product, you have opted for durability, optimum user convenience and highest quality. In addition, upon payment of an optional one-off charge, Miele offers an exclusive extended warranty of up to 10 years, including 2 years manufacturer's warranty.

Longterm cover

Miele is the only manufacturer to offer a comprehensive extended warranty for a total of 10 years

Maximum security

During this extended warranty period, there will be no repair charges for faults, unless caused by wrongful intent or gross negligence.

New for old replacement

You will receive a new appliance, if we cannot repair yours.

Highest flexibility

You can enter into the contract at any time during the entire 2-year statutory warranty period.

Reliable and fast

If the need for repair arises, our highly-skilled service technicians will provide fast and reliable assistance. Throughout the 2-year statutory warranty period you have the opportunity to purchase a Miele Service Certificate for 5 or 10 years.

The extended warranty for a total of up to 10 years is available on all Miele appliances excluding Mastercool, coffee machines & vacuum cleaners.

Select either the 5 or 10 year warranty options below at the time of purchase in order to benefit from our Free Delivery & Installations too.

Delivery & Installation will be charged separately on products purchased with a standard warranty.

Miele@mobile app

App highlights

Miele@mobile app

The Miele@mobile app offers a wide range of functions that enable you to monitor and operate your appliances to achieve the best possible results.

ShopConn@ct

Regarding supplies, you are informed about the current status of your consumables and can order them conveniently via the Internet.

MobileControl

With MobileControl you can select a programme on your washing machine, tumble dryer, and dishwasher even if you are not at home.

Recipes

Here you quickly can find the right recipe for every occasion. Incorporated how-to videos make food preparation really easy.

Assistants

The interactive assistant recommends the most suitable wash or drying programme. This will ensure perfect results every time.

Miele Service

Any questions? Using the Miele@mobile app, you can easily contact us directly by phone or e-mail.

DIALOG OVEN

Dialog Oven

Revolutionary excellence

The Miele Dialog oven will enhance your passion for cooking and is the perfect appliance for the enthusiast who seeks the very best quality. This revolutionary method of cooking will let you cook dishes you never thought possible. Enjoy this new level of excellence, with everything from a simple meal to an entire menu all prepared to perfection.

....and yes, the Dialog Oven can cook a fish in a block of ice.

DIALOG OVEN KEY FEATURES

M Chef

The revolutionary M Chef technology cooks the entire volume of the food from the outset to ensure that it is heated evenly. This is done by supplying energy in the form of Gourmet units. At the same time, the cooking process is monitored and adjusted constantly. This allows you to prepare dishes that wouldn't have been possible before. You can also just use the conventional functions if necessary.

MobileControl

Keep an eye on things at home or on the go: you can use a smartphone or tablet to check the status of the Dialog oven, monitor the cooking process or stop a programme while you are out and about. Or you can send the settings for your favourite recipe directly to the Miele Dialog oven via the app. For unrivalled convenience, anytime, anywhere.

Gourmet Pro

Cook your food just the way you like it: the Gourmet Pro programme allows you to set all of the parameters individually. The Miele Dialog oven will prepare everything in line with your precise specifications.

Expert advice

Optional assistance: the Gourmet Assistant is a virtual expert that offers you advice while you are cooking. Based on the nature and weight of your food, the Gourmet Assistant will suggest the appropriate intensity, function, temperature and number of Gourmet units. This offers you unparalleled convenience: simply confirm the settings to enjoy perfectly prepared meals.

Gentle defrosting

With the Miele Dialog oven, you can defrost food at short notice so there is no need to plan ahead: food is defrosted quickly, gently and evenly, with no parts staying frozen or starting to cook. This allows you to defrost frozen cakes, bread or meat in no time at all – should you receive spontaneous visitors, for example. The quality of the food is preserved and the texture and appearance are unaffected.

OVEN KEY FEATURES

Ovens at a glance

Moisture Plus

Increasing the humidity in the oven optimises cooking of a variety of foods: soft, delicious smelling bread with a shiny, appetising crust; bread rolls and croissants as delicious as those from the local baker; succulent, tender meat with a nicely browned crust, perfect oven bakes, delicious soufflés and so much more.

FlexiClip runners

The fully extending runners allow baking trays, baking and roasting racks and gourmet oven dishes to be pulled completely out of the cooking compartment and held securely in any position. So you can comfortably baste a roast or turn food over, for example, without the risk of burning yourself on the hot oven interior. Versatile use at every level.

FoodView

How is your bake doing? The camera in the oven compartment will show you what is happening – wherever you are, using any compatible mobile device or tablet.

TasteControl

Perfectly cooked: after a time-controlled process, the oven compartment is cooled down to stop the food cooking.

Pyrolytic cleaning

Pyrolytic cleaning is an automatic process in which residue in the oven is incinerated to ash at a very high temperature. This makes arduous scrubbing and abrasive cleaners a thing of the past. The pyrolytic self-cleaning feature turns all food residue to ash which can be easily removed from the oven surfaces without a trace.

PerfectClean finish

Cleaning made easy: Many components in your Miele oven, oven interior, baking trays and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is easily removed using water with a dash of washing-up liquid and a sponge.

MotionReact

You can control your oven without pressing a button. Approach the appliance, the oven compartment will light up alternatively the display will switch on based on your preference.

Wireless food probe

Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use. The special highlight: It is always at hand, as it is stored in the oven door.

What do the icons mean?

Microwaves at a glance

Popcorn Button

Prepare perfect popcorn at the touch of a button. Times and wattages are tailored to prepare a 100gram packet of popcorn. The pre-programmed times can be modified to suit your personal taste.

Automatic programmes

With electronically regulated programmes for over 100 international dishes, you can cook and bake cakes, bread, meat, etc. to perfection. No need to programme the mode or temperature and duration. In addition, the degree of cooking and the browning level can be adjusted.

Capacity

The ovens offer a 43 litre or a 46 litre cabinet. Which offers ample space for both cooking & baking.

CleanSteel

Features are particular high grade CleanSteel finish. This allows for easy cleaning and fingerprints are barely visible.

Food probe

Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use.

Energy efficiency

Miele appliances convince with extremely low energy consumption. A large percentage of Miele cookers and ovens are categorized in energy efficiency class A+. This protects the environment - and your household budget.

PerfectClean finish

Cleaning made easy: Many components in your Miele oven, oven interior, baking trays and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is easily removed using water with a dash of washing-up liquid and a sponge.

Controls

Convenient user friendly control panels are operated quickly & intuitively by simply touching or swiping the clear text display.

STEAM COMBINATION KEY FEATURES

Combination ovens

Multi Steam

Optimum steam distribution via 8 inlets. The powerful steam generator ensure fast steam as well as shorter heat up times. The distribution of steam around the cooking containers achieves faster uniform cooking result.

Automatic programmes

For cooking various types of food. Simplify your everyday tasks, manual selection of temperature & duration is not required. With Automatic menu cooking, the temperature cooking time and sequence in which dishes are added are automatically controlled. MenuCooking makes life easier by cooking 3 different food types at the same time.

Lift-Up Fascia

The Lift-Up door allows horizontal & vertical combinations with many other Miele built-in appliances. The water container is situated here.

Capacity

No other Steam oven provides as much space. With 3 to 4 cooking levels. Allowing you to cook a complete menu for several people in one process.

Combination cooking

You want food that is succulent on the inside, crispy on the outside? Combination cooking provides results entirely to your taste.

Automatic menu cooking

Cook several components at the same time: temperature, cooking time & sequence are determined automatically.

Mix & Match

Delicious dishes in the twinkling of an eye: with Mix & Match you can cook different foods on one plate at the same time.

Wireless food probe

Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use. The special highlight: It is always at hand, as it is stored behind the fascia panel.

Touch Control

All Miele Gourmet drawers are operated by controls under the flush glass fascia. For convenient use & easy cleaning. You can select 1 of 4 temperatures within the temperature range of the chosen mode. Timers can be set and switches off automatically at the end of the programmed time.

Slow Cooking

Low temperature cooking is a professional method of food preparation, giving high quality, tender & juicy results on meat. The meat can be sliced directly after cooking.

SoftClose

Using this mechanism, the fully telescopic runners glide gently & quickly back into their original position. Crockery & dishes remain in their place, thus spilling is prevented.

Push 2 Open

Miele built in drawers without handles are perfectly in-line with built-in appliances. The drawer opens wide, making loading & operating easy.

The drawers are easy to open by hand or if you do not have a hand free when carrying crockery, use your knee or elbow.

GOURMET DRAWERS KEY FEATURES

Vacuum sealer drawers

Food storage

Vacuum-sealed foodstuffs stay fresh for longer. They are stored in the PerfectFresh zone in the fridge on a temporary basis. However, once vacuum sealed, fish and vegetables stay fresh for longer, without compromising on taste or quality. Vacuum sealing protects food against freezer burn, or contamination via smell or flavour. Not least of all, bread and rolls remain fresh for much longer at room temperature once they have been vacuum sealed.

Marinating

Do you like your meat and fish to have a really intense flavour? Marinate your food in your usual manner and then vacuum seal it with the Miele vacuuming drawer. By vacuum-sealing the taste of the marinade is greatly intensified, since flavours do not oxidize. The herbs and spices can work directly and in a very concentrated form on the food.

Re-sealing

After an evening in front of the TV with crisps and popcorn there are often some opened bags that have not been finished. What should you do with them? The vacuuming drawer offers the perfect solution: It seals the original packaging gently and securely on setting 1. This means that foodstuffs are protected against contamination via taste or smell. So they're just as fresh the next time around.

Easy-care interior

Easy cleaning guaranteed. The vacuuming chamber is equipped with seamless stainless steel sheets. This means that it is particularly easy to clean after use.

CleanSteel

All Miele appliances in stainless steel have a premium CleanSteel finish. This finish allows the surface to be kept clean very easily and without special detergents. Fingerprints are nearly invisible on CleanSteel.

Vacuum bags suitable for food

Safety is a priority. Supplied with different sized plastic bags. They are food-safe, heat-resistant, boil-proof and tear-resistant and contain no plasticisers. Food is safely stored. Transfer of flavours is prevented. Additional vacuum bags are available to purchase from the Miele shop.

Vacuuming

Ideal conditions for longer storage life. In the Miele vacuuming drawer the oxygen and air are removed from the vacuum bags. This creates the ideal conditions for the longer storage of foodstuffs and also the perfect preparation for sous-vide cooking in the steam combination oven. A choice of three vacuuming settings is available to suit your needs. Setting 3 is ideal for marinated meat, whereas setting 1 is perfect for delicate foodstuffs such as berries.

Generous usable area

Versatile vacuuming. The Miele vacuum sealing drawer is suitable for different sizes of bags and containers. The interior space is big enough for all sorts of food from small portions up to a maximum size of 250 x 350 mm and a height of up to 80 mm.

SMARTLINE

Intelligent pan detection

Intelligent pan detection recognizes where the pan is: with flexible cooking zones, the control elements simply move to where they are needed.

Smart Select

Power levels can be selected directly via the number scale. The controls, highlight in yellow are easy to read from any angle. Ultimate convenience as well as excellent legibility.

Keeping Warm Plus

Perfect for keeping food warm, for heating up cold food due to exact temperature control. Thus resulting in perfectly heated food that doesn't burn.

Power Flex

Particularly versatile & flexible. Individual cookware such as large Pasta Pans or Oven dishes can all be used effortlessly without any problems, by selecting the 'bridge' function

Comfort Clean

Fast cleaning : Remove the Pot rest & wash in the dishwasher. This makes cleaning particular easy as well as saving time.

Con@ctivity 3.0

Your cooker hood responds automatically. The extraction power is automatically adjusted to what is happening on the hob, ensuring a pleasant room climate at all times. The appliances communicate with each other via WiFi. Con@ctivity 3.0 allows you to integrate the cooker hood and hob into Miele@home.

Twin Booster

All zones are fitted with a single or Twin booster. If activated, the cooking zone will operate on full power, to enable rapid heat up times. The booster can be used on 2 cooking zones at once, ensuring ease of use for different pan sizes.

Stop & Go

Allows for short breaks whilst cooking. The power output of all active cooking zones is reduced to level one & power is reinstated at the touch of a single button.

Gas Stop Restart

This function makes use of electronics which recognises when the gas flame gets extinguished or if a pot boils over. Thus automatically reignites the gas flame. If this does not work, the gas supply is switched off immediately. Simple & Safe.

Quick Start

No need to press or hold down the control : All gas Hobs with electronic controls can be switched on easily and conveniently.

IMPORTANT GUIDE LINES WHEN ORDERING EXTRACTORS:

1. Enquire if the customer wants a VENTED or RECIRCULATING model
2. Determine Counter Height
3. Determine Ceiling Height
4. Minimum Height for the Gas Hob to Extractor 65cm (models may vary check your brochure CD for full details)
5. Minimum Height for the Electric Hob to Extractor 45cm
6. Maximum possible height for both Gas and Electric Hobs to Extractor 70-75cm and 1.3meter for the DA2906
7. Ceiling Height to floor minus counter height minus min / max Hob to Extractor length equals the min / max height of Extractor required
8. If the Required Extractor Length does not fit in with the min / max guide per extractor below order a specialised extractor length
9. Specialised Extractors are ordered on acceptance from the customer with fullpayment received

COFFEE MACHINES

OneTouch for Two

Preparation of one or two coffee specialities at the touch of a single button. This function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be produced at the same time.

Easily Removable Brew Unit

The brew unit is the heart and soul of automatic coffee making. It is easily removed and cleaned. This ensures perfect hygiene of the brew unit, producing coffee of the same high quality and longevity of your machine.

Coffee select

Our patented CoffeeSelect* ensures maximum enjoyment and top-quality coffee. There are three separate containers for different types of beans – so each coffee speciality is prepared with the right one. You can select the bean types manually or assign them permanently to particular drinks – giving you maximum flexibility.

Automatic cleaning

Your Miele coffee machine will take care of cleaning and descaling for you. Effortless removal of dirt and limescale: Miele takes care of cleaning and descaling¹ your coffee machine so you can spend your time on more important things.

Only available on CVA7845 models.

Comfort Clean

The ComfortClean system makes hygiene very easy. Many of the coffee machine components such as the water container and waste container can be cleaned in a dishwasher.

Easy Click

Innovative and only available from Miele. The milk system simply clicks into place at the front and is easily removed.

Comfort Door

Easy access: convenient access to bean container, water container, grounds container and drip tray.

CupSensor

Ideal distance: the CupSensor recognises the rim of the cup and its motorised height adjustment automatically alters the position of the central spout accordingly.

Aromatic System

The dynamic brew unit on Miele coffee machines expands when water flows in, allowing the coffee powder and the water to blend better.

Coffee & Tea

Prepares 20 different types of hot drinks automatically. And the best yet: The individual preparation of various types of tea. Whether green or black, herbal or fruit tea: The water is always dispensed at the optimum temperature - for perfect tea flavour.

MASTERCool

REFRIGERATION KEY FEATURES

MasterCool Fridges & Freezers features

MasterCool

DynaCool

Perfect food storage. Top or bottom – where is it best to store your food? Thanks to DynaCool, you never need to ask yourself this question ever again. In MasterCool refrigerators, you can store your food wherever you like, as a fan on the back wall ensures that cold air circulates. This results in uniform temperature throughout the entire unit.

BrilliantLight

A number of halogen emitters illuminate each area of the refrigerator and show the refrigerated items in a pleasant soft light. The aluminium profiles, shimmering like velvet, add an extra touch of elegance to your appliance.

Drop and Lock

The metal door compartments are infinitely height-adjustable. The well thought-out functional principle provides particularly simple handling; the compartments can be easily and securely locked in place.

MasterFresh

In the humidity-controlled MasterCool drawers, your food is stored in individual micro-climates: The temperature is approximately 0 °C and the humidity is perfectly adapted to suit all types of food. Your food - especially fruit and vegetables - stay fresh for longer.

WINE CONDITIONING

Refrigeration Wine Conditioning features

Push 2 Open

At the touch of a finger tip the door opens slightly. This allows it to be opened gently. The door closes just as softly to prevent any shuddering.

DynaCool

The integrated fan ensures that air circulates evenly resulting in uniform temperature & humidity levels.

Sommelier Set

Sommelier set can accommodate decanters, glasses & open wine bottles. Used to keep Bottles in their perfect temperature. The wine glasses can be chilled as well.

FlexiFrame

Just one movement: move individual slats so that large wine bottles are easy to store.

DISHWASHING

DISHWASHER KEY FEATURES

Dishwashers at a glance

6.5L Fresh Water Consumption

Miele dishwashers rely solely on fresh water and in the SensorWash programme wash crockery with as little as 6.5 l of water. Electricity consumption is also reduced to new all-time lows: in the ECO programme, Miele dishwashers achieve energy consumption values of only 0.83 kWh.

AutoOpen Drying

The dishwasher door opens a fraction automatically at the end of a programme cycle. This allows fresh, dry air to enter the dishwasher, and even challenging items such as plastics and glassware are perfectly dried. Special airducting protects the worktop from moisture.

Perfect Glass Care

Soft water enhances cleaning performance in a dishwasher but is aggressive to glassware. Consequently, all Miele dishwashers feature Perfect GlassCare technology. This helps protect glassware and keeps stemware looking as good as new for longer.

Noise Level

Miele's ExtraQuiet programme produces sound emissions of only 38 dB(A) and is so quiet that you can hardly hear it. Ideal for open-plan kitchens and when the dishwasher is run overnight. Miele dishwashers wash with sound emissions as low as 41dB(A) particularly quiet. This is even considerably quieter than a normal conversation.

Patented* 3D cutlery tray+

Added versatility: Centre section can be lowered and is equipped with a hinged row of spikes for cutlery items.

Indoor Salt Container

The patented salt container is located in the dishwasher door, allowing you to replenish the salt comfortably from a standing position, with the door half open. Eliminating the need to bend down and try and access the lower inner cabinet.

Knock 2 Open

The dishwasher door will open automatically by simply knocking the furniture panel twice, this allows for perfect seamless integration into the kitchen cabinetry and eliminates the need for a door handle.

Quick PowerWash

Excellent cleaning performance...
Unmatched synergy: The new dishwasher programme QuickPowerWash and the specially designed UltraTabs Multi achieve the best possible cleaning and drying results for normally soiled crockery in 58 minutes.

Dishwasher Detergents

For best results use Miele care collection

Ultra Tabs

Each dishwasher detergent tablet features a powerful enzyme formula and a three-layer construction that delivers superior wash results. They can be used with any brand of dishwasher.

Dishwashing Powder

Miele's ingredients dissolve proteins and starch in cold water and help remove persistent dried on food soil. The special formula contains active oxygen for perfect results, and can be precisely dispensed thanks to the easy pour bottle.

Rinse Aid

Sparkling dishes and glassware come standard when you use Miele rinse aid! It's formulated to prevent long-term etching in glassware and can be used with any brand of dishwasher.

Dishwasher Salt

Miele dishwashers have a built-in water softener. This is especially critical in areas where the water source is found to be very 'hard'. Salt dissolves during the cycle and ensures your machine delivers the very best results.

Dishwasher Freshener

Miele's lemon freshener can help rid the dishwasher of unpleasant odours. The active ingredients combine natural and artificial citrus oils that effectively combat odors

LAUNDRY

WASHING MACHINE KEY FEATURES

Washing Machines at a glance

ProfiEco motor

Powerful and economical: Quiet, powerful energy-saving wash with Miele ProfiEco EnergySave motor. Long-lasting.

Spin Speed

You can alter the pre-set spin speed of a wash programme. At this high spin speed, the residual moisture level is only 43%–44% after spinning, making subsequent tumble drying very economical.

Cap Dosing

Miele offers small portioned capsules that are simply placed in the fabric conditioner compartment for textiles requiring special care. The Miele washing machine dispenses the contents of the Caps at the perfect point in time during the wash process – automatically.

Hygiene

AllergoWash* - This option should be used where high standards of hygiene are required. More energy is used to lengthen temperature holding times and more water is used to increase rinsing efficiency. Dust mites and bacteria do not stand a chance with a higher water level and an extended temperature holding time.

Softsteam drum

Ranges from 1-7kg, 1-8kg & 1-9kg honeyComb drum. Achieve perfectly treated laundry quickly: the Pre-ironing function smooths your garments before they leave the drum to minimise ironing time.

TwinDos

With this function the two detergent containers are used with the washing machine and, at the touch of a button, the appliance dispenses the optimum quantity of detergent for the laundry to be washed.

Powerwash 2.0

It achieves a cleaning performance at a speed which has never been achieved before in laundry care. The PowerWash System comprises of Intensive Flow that ensures outstanding wash performance which increases by 10%.

Steam Care

Enjoy 50% less ironing – after a wash programme or as a separate smoothing programme. It gently removes creases from the most delicate items. Environmentally friendly.

TUMBLE DRYER KEY FEATURES

Tumble Dryer at a glance

Drum Load

Ranges from 1-7kg, 1-8kg & 1-9kg. Fewer creases, easier ironing: the honeycomb structure allows laundry to be dried gently and evenly.

FragranceDos

Indicates if fragrance flacons can be used on the appliance. Freshness for all the senses: with Miele you not only have particularly bouncy but also beautifully fragrant laundry.

HeatPump

Indicates if the appliance features heat-pump technology. Uses half as much energy as conventional condenser tumble dryers. Using a Miele heat pump dryer can considerably reduce not only your energy costs but also the burden on the environment. Complete delicate garment care with also particularly gentle drying.

SteamFinish

Achieving perfectly tumbled textiles fast, this steam and heat smoothes your textiles before they leave the tumble dryer.

EcoDry technology

The filter system and the maintenance-free heat exchanger keep energy consumption and run time low.

Perfect Dry

Always perfectly dried: PerfectDry detects the mineral content of the water and modifies the drying process.

TRIFLEX

3ⁱⁿ¹
INNOVATION

HX1 TRIFLEX HANDSTICK VACUUM CLEANER

Vacuum Cleaners

Cordless Handstick Range - Arriving March 2020

3in1 concept

The design concept of the Triflex HX1 optimally adapts to your needs and wishes. This gives you maximum flexibility for every situation. Individual comfort: The design concept of your Miele vacuum cleaner optimally adapts to your needs.

Maximum range

Wide range of possibilities: Whether you want to vacuum under flat furniture or remove dust from the ceiling, the Triflex HX1 PowerUnit allows maximum flexibility. You can easily get under the beds or cupboards with the vacuum cleaner - for perfect cleanliness in your home.

Effortless

Perfect for large areas: Thanks to its low weight, your vacuum cleaner fits perfectly in your hand. For small suction breaks in between the vacuum cleaner is equipped with a shut-off function.

Easy handling

You just want to vacuum some crumbs off the couch or free the car seats of dust? It is very easy to remove and use independently because of the suction tube and the electric brush. Thus, it is quickly ready for use - you save time and still enjoy efficient cleaning.

Fresh Air

With the HEPA * Lifetime Filter, you can turn your four walls into an allergy-friendly zone. Even microscopic particles and allergens are trapped and filtered at 99.99.

Turbo brush

The 28 cm wide electric brush frees larger surfaces from dust in a very short time. Whilst the special air flow ensures a strong suction power. The intelligent brush recognizes the type of floor covering: vacuuming on carpets automatically increases the performance. Thanks to BrilliantLight, dust in dark corners no longer has a chance.

CYLINDER RANGE BAGGED VACUUMS

Versatility always on board

Miele cylinder vacuum cleaners are equipped with three high-quality, standard attachments: upholstery nozzle, crevice nozzle and dusting brush. They are stored dust-free inside the appliance or – exclusively with Miele – on a Vario-clip and are always conveniently within reach.

Cat & Dog | Allergy

For true pet lovers. Thanks to its special accessories, it is ideally suited to cater for the requirements of households with pets.

The Allergy vacuum cleaner offers the highest hygiene requirements.

Ideally for people who suffer from allergies & sinus problems.

Active AirClean

The Activated Charcoal filling ensures that any smells or bad odours from the dustbag is absorbed before it leaves the cleaner & the exhaust air is always fresh.

Odour Absorption allows for effective filtration with timestrip filter replacement indicator.

Hygiene

Miele vacuum cleaners' exceptional filtration is based on a multi-stage system. It consists of the innovative Miele HyClean dustbag, motor protection filter and Miele exhaust filter. The interaction of these components ensures that more than 99.9% of fine dust is filtered. So you can breathe with ease!

HEPA AirClean filter

"With Miele, you can choose from three different exhaust filters." The HEPA AirClean filter retains even the smallest particles. The timestrip® lets you know when the filter should be changed.

BLIZZARD

Vortex Technology

The Vortex technology produces an enormous flow velocity of more than 100 km/h. Combined with the specially designed floorhead and the aerodynamic air flow, the bagless vacuum cleaner achieves first-class cleaning performance. This ensures that both coarse and fine dust are separated in an outstanding manner.

HEPA Lifetime Filter

With the HEPA lifetime filter, up to 99.999% of the smallest particles of fine dust and allergens are retained by the system. Perfect for people who suffer from allergies.

ComfortClean

Special sensors measure the air throughput of the GORE® CleanStream® fine dust filter and automatically activate the ComfortClean self-cleaning function as needed. To complete this, the appliance switches off for about 20 seconds. The ComfortClean function can also be activated manually.

Hygiene Lifetime Filter

The Hygiene lifetime filter features very high dust retention capacity and collects 99.98% of all fine particles. This is the type of hygienic cleanliness that you want for your home.

Click2Open

The dust container can be removed by pulling it upwards by its handle. The container is then opened by pressing the 'Empty' button. Once open, the collected dust simply drops out.

 R9⁹⁹⁹

SCOUT ROBOT RX1 & RX2

RX2 Scout - Arriving March 2020

3D Smart Navigation

Intelligent navigation: 2 front cameras enable high-precision 3D object detection for comprehensive cleaning.

120 min non-stop

Thanks to a powerful lithium-ion battery, the Scout runs for longer on a single battery charge. If the battery charge is not sufficient, the Scout returns to the base station for recharging. It will then continue cleaning from the location where it had stopped – fully automatically.

Home Vision2 & MobileControl

Check everything is OK at home: encrypted, live image transmission from the front camera to a mobile device. Mobile control and monitoring: with the "Miele Scout RX2" app for mobile devices – anytime and anywhere.

Traversing onto carpet

With its powerful motor and anti-skid wheels, the Scout masters the transition from smooth floors to carpet without any problem. Even thresholds do not throw it off balance.

Dustbox & AirClean filter

0.4 litre capacity for all dust collection. An AirClean Plus filter has been added, breathe with ease: The AirClean Plus filter ensures particularly clean room air thanks to effective filtration.

CONSUMABLES

CARE COLLECTION KEY FEATURES

For best results use Miele care collection

UltraWhite Powder

For brilliantly white laundry. The powerful formula with its high active oxygen content ensures optimum wash results and brilliantly white laundry.

CapDosing

The perfect addition for special applications convenient capsules: Dispense special detergents, fabric conditioners and additives using single use capsules.

Reproofing Agent

Ideal for sports clothing and waterproof clothing. The Miele proofing agent provides effective retention of breathability as well as wind- and dirt-resistance for all outdoor textiles.

UltraColor Detergent

For vibrant colours special protection components and care materials leaves colours radiant and helps your clothing retain its brightness even after numerous laundry cycles.

TwinDos

Both liquid detergents are automatically dispensed at the optimum time during the programme. Best liquid detergents system available on the market for coloured or whites fabrics.

Outdoor Detergent

For high-quality outdoor clothing. The lanolin contained in the detergent acts like a soothing bath for the membrane. It remains elastic and flexible and retains its complete functionality.

Fragrance Flacon

The new Miele flacons envelop your laundry with a pleasant fragrance during drying. The flacon is simply fitted into the easily accessible fluff filter and distributes an unobtrusive fragrance evenly onto your laundry.

Sportswear

For breathable sportswear. Neutralises unpleasant odours. Cleans and retains the brilliance of colour. Perfect for fleece & lycra fabrics.
